# BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, RAWALPINDI

INTERMEDIATE (12TH CLASS) EXAMINATION, 2024

# COMPUTER SCIENCE

Past Paper 2024 • Paper Code: 883

Retyped faithfully from the original board paper — same questions, no changes.

## PART - I (OBJECTIVE)

### COMPUTER SCIENCE — PART - I (OBJECTIVE)

**Time Allowed:** 20 Minutes | **Maximum Marks:** 15 | **Paper Code:** 883

Note: Note: Write answers to the questions on the objective answer sheet provided. Four possible answers A, B, C and D to each question are given. Which answer you consider correct, fill the corresponding circle A, B, C or D given in front of each question with marker or pen ink on the answer sheet provided.

QMS-ACCESS. MS-ACCESS

Q1. In an ER diagram, the rectangle represents:

(A) Attribute
(B) Entity
(C) Record
(D) Relationship

Q2. In 3NF, a non-key attribute must not depend on a:

(A) Key attribute
(B) Composite attribute
(C) Primary attribute
(D) Non-key attribute

Q3. The output of the query is in the form of a:

(A) Form
(B) Object
(C) Table
(D) Report

Q4. In MS Access, text type allows maximum number of characters up to:

(A) 254
(B) 255
(C) 260
(D) 266

Q5. Select a data model which is more flexible among others:

(A) Network data model
(B) Hierarchical model
(C) Logical data model
(D) Relational data model

Q6. In a table, each primary key value should be:

(A) Unique
(B) Summarized
(C) Non-unique
(D) Null

## QC-LANGUAGE. C-LANGUAGE

Q7. Format specifier %.3f for the value of −.005 will produce output:

(A) □.005
(B) −.005
(C) □−.005
(D) −0.005

Q8. Select a statement which is used for making two-way decision:

(A) Switch
(B) If – else
(C) If
(D) nested if

Q9. Consider x = 12 and y = 13, the output of the expression x > y ? x + y : x − y; will be:

(A) −1
(B) 1
(C) 25
(D) 15

Q10. Select the loop in which condition is written before the body of the loop:

(A) do – while loop
(B) wend loop
(C) infinite loop
(D) while loop

Q11. Local variables are created in:

(A) Hard disk
(B) ROM
(C) RAM
(D) Cache

Q12. On successfully closing a file, the fclose( ) returns:

(A) Null
(B) 0
(C) 1
(D) −1

Q13. A program that combines object program with additional object files is:

(A) Linker
(B) Loader
(C) Preprocessor
(D) Interpreter

Q14. An equivalent expression to a /= b is:

(A) b /= a
(B) a =/ b
(C) a = a/b
(D) b = b/a

Q15. Select format specifier that displays character on the screen:

(A) % d
(B) % f
(C) % c
(D) % X

Q(OR) VISUAL BASIC. (OR) VISUAL BASIC

Q7. Select the operator used for string concatenation:

(A) – (Under score)
(B) & (Ampersand)
(C) / (slash)
(D) + (plus sign)

Q8. In VB which statement is used to declare variable:

(A) Sub
(B) Dim
(C) Identifier
(D) Event

Q9. The entire select case construct is terminated with:

(A) End Select
(B) Case Else
(C) End if
(D) Stop select

Q10. The statement that will immediately terminate a For …. Next loop is:

(A) End for
(B) Exit loop
(C) End loop
(D) Exit for

Q11. Select a control which is invisible at run time:

(A) Label
(B) Image
(C) Timer
(D) Drive List Box

Q12. A window that requires the user to take some action before the focus can move to another form:

(A) Modelessly
(B) Modal
(C) Modular
(D) Module

Q13. The rectangle symbol in flow chart indicates:

(A) Process
(B) Input
(C) Output
(D) Condition

Q14. In Visual Basic, a form is another name for:

(A) Tool
(B) Property
(C) Object
(D) Code

Q15. The property that changes text color is:

(A) Back color
(B) Font color
(C) Fore color
(D) Text color

# PART - II (SUBJECTIVE)

## COMPUTER SCIENCE — PART - II (SUBJECTIVE)

**Time Allowed:** 2:10 Hours | **Maximum Marks:** 60

QSECTION - I. SECTION - I — MS-ACCESS

Q2. (Marks 12) Write short answers of any six parts from the following: (6 × 2 = 12)

i. Differentiate between data and information.

ii. Consider the following figure and indicate the Field names and records: [Table: R No | Name | Class ID | Dep ID — rows: 1 | Asif Ali | 10 | 4; 2 | Aysha | 10 | 4; 3 | Saleem | 11 | 1]

iii. Write two responsibilities of database Administrator.

iv. How will you determine that software development is feasible for an organization or not?

v. Write two differences between cardinality and modality of a relation.

vi. Why it is important to normalize the relation before you use it for storing data?

vii. What is the purpose of IDE in MS-ACCESS?

viii. Differentiate between design view and data sheet view of table.

ix. Write purpose of 'validation' and 'input mask' properties.

QC-LANGUAGE. C-LANGUAGE

Q3. (Marks 12) Write short answers of any six parts from the following: (6 × 2 = 12)

i. Define string constant. Give an example.

ii. Write the equivalent statement in Language C, for the following: $S = Vit + ½at^2$

iii. Predict the output of the following code segment: int a = 7; int y = 3; printf("%d and %d", x/y, x%y);

iv. Find errors in the following: void main() { int c = 7; printf("%d", c; }

v. Compare getch and getche function.

vi. Find errors in the following code segment: void main() { int x = 5; int y sum = x + y printf("%d", sum); }

vii. Find the output of the following code segment: void main() { printf("How \t are \t you"); printf("\n Bye"); }

viii. How file is opened in C-Language?

ix. Define file pointer.

Q(OR) VISUAL BASIC (V.B). (OR) VISUAL BASIC (V.B)

Q3. (Marks 12) Write short answers of any six parts from the following: (6 × 2 = 12)

i. Differentiate between design time and run time.

ii. Define IDE.

iii. Write down two steps for creating Visual Basic project.

iv. Distinguish between object and event.

v. Describe key up event.

vi. Distinguish between hiding and closing of a form.

vii. Define focus.

viii. Name and explain two styles of combo box.

ix. Distinguish between 'Default' and 'Cancel' properties of command button.

QC-LANGUAGE. C-LANGUAGE

Q4. (Marks 12) Write short answers of any six parts from the following: (6 × 2 = 12)

i. Why should you use a default label in switch structure?

ii. Determine output of following code segment: int x = 1, y, z; if ((x == y) || (y == z) || (z == 2)) printf("yes"); else printf("No");

iii. Write the syntax of do while loop.

iv. Convert following code into while loop: void main() { int i; for (i = 1; i <= 10; i++) printf("Pakistan"); }

v. Determine output of following code: int i, p = 1; for (i = 1; i < 6; i += 1) p *= 2; printf("%d", p);

vi. Define between actual and formal parameters?

vii. What do you know about user defined functions?

viii. What is the scope of local variable?

ix. What is function definition?

Q(OR) VISUAL BASIC. (OR) VISUAL BASIC

Q4. (Marks 12) Write short answers of any six parts from the following: (6 × 2 = 12)

i. Write the syntax of message box in VB.

ii. What is concatenation and when would it be useful?

iii. What is compound condition? Give example.

iv. When should an if block be used instead of select case block?

v. When should you use do while loop?

vi. Which statement terminate do and for loop early?

vii. Write the syntax of do loop until.

viii. Draw flow chart of do loop while.

ix. Write output of following code segment: i = 1 Do Print i * i i = i + 1 Loop while i <= 5

## SECTION - II (MS-ACCESS)

QSECTION - II. SECTION - II

> Note: Note: Attempt any one question from the following: (MS-ACCESS) (8 × 1 = 8)

Q5. (Marks 8) What are data base anomalies? Briefly discuss insertion, deletion and modification anomalies.

Q6. (Marks 8) Explain any four data types available in MS-ACCESS.

## SECTION - III

QSECTION - III. SECTION - III

> Note: Note: Attempt any two questions either from "C-Language" or "Visual Basic". (8 × 2 = 16)

Q(C-LANGUAGE). (C-LANGUAGE)

Q7. (Marks 8) Describe the characteristics of high-level programming languages.

Q8. (Marks 8) Write a program in C-Language which takes three members as input from user & display the smallest number by using logical operators.

Q9. (Marks 8) Write a program that displays first five numbers and their sum using while loop.

Q(VISUAL BASIC). (VISUAL BASIC)

Q7. (Marks 8) Describe the characteristics of high-level programming languages.

Q8. (Marks 8) Write a program in VB which takes three numbers as input from user & display the smallest number by using logical operators.

Q9. (Marks 8) Write a program that displays first five numbers and their sum using while....wend loop.
