BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, LAHORE

INTERMEDIATE (12TH CLASS) EXAMINATION, 2022

COMPUTER SCIENCE

Past Paper 2022

Retyped faithfully from the original board paper — same questions, no changes.

Objective Type

Time Allowed: 20 Min. | **Maximum Marks:** 15

Note: Four possible answers A, B, C and D to each question are given. The choice which you think is correct, fill that circle in front of that question with Marker or Pen ink in the answer-book. Cutting or filling two or more circles will result in zero mark in that question.

Note: Objective Type

Note: (MS-ACCESS)

Q1. How many table views are available in MS Access:

(A) 1
(B) 2
(C) 3
(D) 4

Q2. In relational database, a table is also called:

(A) Tuple
(B) Relation
(C) [illegible in source scan]
(D) [illegible in source scan]

Q3. CREATE command is used to create a:

(A) Table
(B) Form
(C) Report
(D) Query

Q4. In ERD model, the relationship between two entities is represented by a:

(A) Diamond symbol
(B) Rectangular box
(C) Oval symbol
(D) Line

Q5. Which of the following type of file require largest processing time:

(A) Sequential file
(B) Random file
(C) Indexed sequential file
(D) Direct access file

Q6. A database consists of various components called:

(A) Tool
(B) Properties
(C) Entities
(D) Object

> Note: C-Language OR Visual Basic

> Note: (C-Language)

Q7. Single line command starts with:

(A) #
(B) //
(C) [illegible in source scan]
(D) [illegible in source scan]

Q8. Function prototypes for built-in functions are specified in:

(A) Source files
(B) Object files
(C) Header files
(D) Image files

Q9. Which of the following is the simplest form of a decision structure:

(A) If statement
(B) Switch
(C) If-else-if
(D) Nested if

Q10. The set of statement in curly braces in a loop is known as -------- of the loop:

(A) Title
(B) Header
(C) Center
(D) Body

Q11. Which of the following key is used to save a file:

(A) F2
(B) F3
(C) F4
(D) F5

Q12. On successfully closing a file, the fclose() returns:

(A) Null
(B) Zero
(C) 1 (one)
(D) file pointer

Q13. The logical not operator, denoted by !, is a:

(A) Ternary operator
(B) Unary operator
(C) Binary operator
(D) Bitwise operator

Q14. a += b is equivalent to:

(A) b + a
(B) a = + b
(C) b = b + a
(D) a = a + b

Q15. Turbo C++ can compile:

(A) C++ programs only

(B) C and C++ programs

(C) Turbo C programs only

(D) Turbo C++ programs

Essay Type

Time Allowed: 2.10 hrs. | **Maximum Marks:** 60

> Note: SECTION - I

> Note: (MS-ACCESS)

Q2. (Marks 12) Write short answers to any SIX (6) questions:

(i) What is entity? Give an example.

(ii) Write the responsibilities of data administrator.

(iii) Explain implementation.

(iv) List any four components of physical database design.

(v) Define referential integrity.

(vi) How partial dependency differs from transitive dependency?

(vii) Define any two layouts of form.

(viii) What is check boxes and radio buttons?

(ix) Describe any two bars of MS Access Application Window.

> Note: C-Language

Q3. (Marks 12) Write short answers to any SIX (6) questions:

(i) Define statement terminator.

(ii) Differentiate between source code and object code.

(iii) Write the following statements as single statement. int x = 5; int y = 10; int z = 15;

(iv) Find the errors in the following code segment. int x, y, sum, z = x + y; printf ("sum = %d", z);

(v) What are comments?

(vi) Write the syntax of print function.

(vii) Write two difference between constant and variable

(viii) Trace the errors in the following code segment void main ( ); { printf (OK) }

(ix) Predict the output of the following code segment. int n, a, b; n = 400; a = n% 100; b = n/ 10; n = n% 10; printf (" Result = %d %d %d", n,b,a);

> Note: OR

> Note: (Visual Basic)

Q3. (Marks 12) Write short answers to any SIX (6) questions:

(i) Why would a programmer prefer to use high level language?

(ii) Find the error in the syntax private Sub Object Name- Dblclick ( ) Statements: endsub; end

(iii) What is the purpose of language processor?

(iv) Write the use of option explicit statement in VB.

(v) What is concatenation and when it would be used?

(vi) How can the user continue a very long basic statement to another line?

(vii) What is properties of Window?

(viii) Write three steps for creating VB projects.

(ix) Why Visual Basic is called even-driven [sic, print for 'event-driven'] language?

> Note: C-Language

Q4. (Marks 12) Write short answers to any SIX (6) questions:

(i) Define compound statement.

(ii) Define while loop.

(iii) Predict the output. int a = 1 , b = 5 ; if (a + b) < 6) printf ("% d", b); printf ("% d", a + b);

(iv) Predict the output. int a; for (a = 1; a < = 10; a ++) printf("% d", a);

(v) Convert the given program in do-while loop. for (i = 3; i < - 39; i + = 6) printf ("%d\n", i);

(vi) What is function?

(vii) Define local variable?

(viii) Differentiate between Built-in functions and user defined functions.

(ix) What is text stream?

> Note: OR

> Note: (Visual Basic)

Q4. (Marks 12) Write short answers to any SIX (6) questions:

(i) Define selection structure.

(ii) What is Select - Case statement?

(iii) Write the syntax of IF-Then-Else statement.

(iv) Find the output of given code. a = 6 b = 7 if (a > b) then print a print b print (a + b) End

(v) What is post lest loop? [sic, print for 'post test loop']

(vi) Re-write the given statement in while- wend. for i = 1 to 10 print i Next

(vii) Enlist two types of sub-programs.

(viii) What is standard code module?

(ix) Differentiate between Exit Sub and Exit function.

> Note: SECTION-II

> Note: (MS ACCESS)

> Note: Note: Attempt any ONE question.

Q5. What is File? Explain File types from storage point of view.

Q6. How would you define a table? Also write characteristics of tables.

> Note: SECTION - III

> Note: Note: Attempt any TWO descriptive answers (either from "C-Language" or from "Visual Basic") of the following questions.

> Note: (C-Language)

Q7. What is meant by programming language? Discuss different types of programming languages.

Q8. Write a program that inputs three numbers and displays the maximum number by using if-else, if statement.

Q9. What is for loop? Write down syntax and working of for loop with example.

> Note: OR

> Note: (Visual-Basic)

Q7. What is meant by programming language? Discuss different types of programming languages.

Q8. Write a program in VB that inputs three numbers and displays the maximum number by using nested if statement.

Q9. What is for next loop? Write down syntax and working of for next loop with example.
