BOARD OF SECONDARY EDUCATION, KARACHI

SECONDARY SCHOOL (10TH CLASS) EXAMINATION, 2023

COMPUTER STUDIES

Past Paper 2023

Retyped faithfully from the original board paper — same questions, no changes.

SECTION "A" MULTIPLE CHOICE QUESTIONS (M.C.Qs)

Maximum Marks: 12

Note: Note: (i) Attempt all the Questions of this section. (ii) Do not copy down the part questions. Write only the answer against the proper number of the questions and its part according to the question paper. (iii) Each question carries 1 mark.

QQ.1. Choose the correct answer for each from the given options:

Q1. The BASIC language developed in the:

(A) Mid-40s
(B) Mid-50s
(C) Mid-60s
(D) Mid-70s

Q2. It deletes the program currently in memory and clears all variables:

(A) CLS
(B) KILL
(C) NEW
(D) DELETE

Q3. Errors detected by the use, are called:

(A) Syntax errors
(B) Logical errors
(C) Runtime errors
(D) None of these

Q4. AND, OR and NOT operators are known as:

(A) Arithmetic operators
(B) Relational operators
(C) Logical operators
(D) All of these

Q5. The functions, defined by the program, are called:

(A) Built-in-function
(B) User-defined function
(C) Sub functions
(D) None of these

Q6. If we are to write more than one statement in a line we use a:

(A) Colon (:)
(B) Semi colon (;)
(C) Comma (,)
(D) Bar (-)

Q7. The computer language has its own set of words, that is called:

(A) Command
(B) Statement
(C) Function
(D) Reserved words

Q8. This command is used to exit from BASIC and to return to operating system:

(A) CLEAR
(B) KILL
(C) SYSTEM
(D) NEW

Q9. The process of finding and removing the errors in a computer program, is called:

(A) Deleting
(B) Debugging
(C) Coding
(D) None of these

Q10. The computer receives the numerical and string data during program execution with the help of:

(A) LET statement
(B) REM statement
(C) INPUT statement
(D) PRINT statement

Q11. The screen output is called:

(A) Softcopy
(B) Software
(C) Hardcopy
(D) Hardware

Q12. A statement that assigns a value to a variable is:

(A) REM statement
(B) PRINT statement
(C) LET statement
(D) LOCATE statement

SECTION "B" SHORT QUESTION ANSWER

Maximum Marks: 24

Note: Note: Attempt any EIGHT questions from this section. Each question carries equal marks.

QQ.2. How do comma (,) and semicolon (;) affect the output of PRINT statement?

QQ.3. Define computer programming language.

QQ.4. What will be the output of the following program?

QQ.5. Rewrite the following statements after removing the errors: 105 FOR A$ = A TO Z | 2.4 IF I = 30 THAN END | -12 RAM practical-1

QQ.6. What is the difference between Direct mode and Indirect mode?

QQ.7. Convert the following algebraic expression into GWBASIC formulae

(i) $a^2 + 2ab + b^2$

(ii) $((1/2) + x^2) / (x^2(1/2))$

(iii) $-b\sqrt{(b^2 - 4ac)} / 2a$

QQ.8. Write the purpose of the following: LIST, AUTO, LOCATE

QQ.9. What is the difference between Counter loop and Controlled loop?

QQ.10. READ/DATA statement is used to assign values to the variables. Explain it with example.

QQ.11. What is the difference between KILL and NEW commands in the BASIC language?

QQ.12. Define Array.

QQ.13. Define language translator.

SECTION "C" DETAILED ANSWER QUESTION

Maximum Marks: 24

> Note: NOTE: Attempt any FOUR questions from this Section. All questions carry equal marks.

QQ.14. What is the difference between High Level Languages and Low Level Languages?

QQ.15. Explain operators and its types.

QQ.16. Write a program to display even numbers from 2 to 20, also draw a flowchart.

QQ.17. Define variable and describe its types.

QQ.18. Define function and describe its types.

QQ.19. Write all forms of the following abbreviations: (any six)

(i) GUI

(ii) BIT

(iii) RAM

(iv) BIOS

(v) CGA

(vi) BASIC

(vii) DBMS

(viii) CPU

(ix) IBM
