BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, RAWALPINDI

INTERMEDIATE (12TH CLASS) EXAMINATION, 2021

COMPUTER-SCIENCE

Past Paper 2021

Retyped faithfully from the original board paper — same questions, no changes.

Computer Science (Objective Type) — Inter-(Part-II)-A-2021 (For all sessions) — Paper Code: 8831

Time Allowed: 20 Minutes | **Maximum Marks:** 15 | **Paper Code:** 8831

Note: NOTE: Write answers to the questions on objective answer sheet provided. Four possible answers A,B,C & D to each question are given. Which answer you consider correct, fill the corresponding circle A,B,C or D given in front of each question with Marker or pen ink on the answer sheet provided.

Q. MS-ACCESS

Q1. Arithmetic manipulation of data is known as:

(A) Summarizing
(B) Classifying
(C) Sorting
(D) Calculations

Q2. An attribute is also known as:

(A) Field
(B) Table
(C) Row
(D) Relation

Q3. In ERD Model, the relationship between two entities is represented by a:

(A) rectangular box
(B) oval symbol
(C) diamond symbol
(D) line

Q4. Every relation must have a:

(A) candidate key
(B) primary key
(C) secondary key
(D) alternate key

Q5. Which of the following object of database is used to retrieve data from database?

(A) Queries
(B) Forms
(C) Reports
(D) Tables

Q6. A referential integrity constraint is a rule that maintains consistency among the:

(A) columns of two tables
(B) two columns of same table
(C) rows of two table
(D) attribute of two tables

Q. C-Language

Q7. Every statement in a C program terminates with:

(A) Colon
(B) Semicolon
(C) Delimiters
(D) comma

Q8. Preprocessor directives are commands for:

(A) Microprocessor
(B) Language processor
(C) Loader
(D) C preprocessor

Q9. Which of the following operators has lowest precedence:

(A) =
(B) !
(C) = =
(D) +

Q10. The logical not operator, denoted by !, is a:

(A) Uniary operator
(B) Ternary operator
(C) Binary operator
(D) Bitwise operator

Q11. The escape sequence for Tab is:

(A) \f
(B) \n
(C) \r
(D) \t

Q12. The format specifier %f is used for:

(A) Character
(B) Integer
(C) Double
(D) Float

Q13. A compound statement refers to a group of statements enclosed in:

(A) ( )
(B) { }
(C) [ ]
(D) " "

Q14. A loop inside the body of another loop is:

(A) For loop
(B) while loop
(C) nested loop
(D) infinite loop

Q15. Function prototypes for built-in functions are specified in:

(A) source files
(B) header files
(C) object files
(D) image files

Computer Science (Essay Type) — Inter-(Part-II)-A-2021 (For all sessions)

Time Allowed: 2:10 Hours | **Maximum Marks:** 60

Q. Section-I (MS-ACCESS) — Marks: 60

Q2. Write short answers of any six parts from the following.

x 6 = 12 2

(i) List two properties of relation.

(ii) What do you mean by primary key?

(iii) Define data modeling.

(iv) What is cardinality?

(v) How is MS-ACCESS loaded?

(vi) What are reports?

(vii) What is Join? Write its purpose.

(viii) Write uses of query.

(ix) Write two advantages of using a microsoft ACCESS IDE.

Q. (C-Language)

Q3. Write short answers of any six parts from the following.

x 6 = 12 2

(i) Why is C known as strongly typed language?

(ii) Describe header file.

(iii) Write shortcut key to run a C-program.

(iv) Give any four examples of valid variable names.

(v) Differentiate between constant and variable.

(vi) What is high level language?

(vii) Determine the output of the following code segment: int m=0, n=5; if(m%n>1) printf("success"); else printf("Failure");

(viii) Find errors in the following code: int P=20 if(P ≥ 5) printf("OK");

(ix) Write an expression in C-language for the given statement: age is from 18 to 25.

Q4. Write short answers of any six parts from the following.

x6=12 2

(i) Write the syntax of printf and scanf functions.

(ii) Define the term stream in context of file handling.

(iii) What is meant by character input in C-programming language?

(iv) Find the errors in the following code segment. a=10; Avg=0; While(a<=10); Avg+=a

(v) Trace the output of the following piece of code. for(int x=1; x<=10; x=x+4) printf("%d\n",x);

(vi) Determine the output of the following code segment. int j=5; While(j<=15) { printf("Pakistan\n") j=j+2; }

(vii) Write down any two benefits of functions.

(viii) What is meant by scope of variable?

(ix) Enlist escape sequences used for different purposes.

Q. Section -II (MS-ACCESS) — 8x1=8

Note: Attempt only one question from the following.

Q5. Write four major components of database system.

08

Q6. Define functional dependency. How do partial dependencies affect a relation?

08

Q. Section -III (C-language) — 8x2=16

Note: Attempt any two question from the following.

Q7. Define programming language. Discuss two main types of programming languages.

08

Q8. What is control structure? Briefly describe basic control structures of C program.

08

Q9. Write a program that prints odd numbers between (1 to 100) using for loop.

08
