MCQs Tayyari presents

BISE Lahore

11th Class • Computer Science

Past Paper 2022

Group I & II • Objective + Subjective

Retyped faithfully from the original board paper — same questions, no changes.

mcqstayyari.online

Group I

Objective Type (Paper-I, Group-I)

Time Allowed: 20 Min. | Maximum Marks: 15

Note: Inter, Part I, 2022 Lahore Board. Four possible answers A, B, C and D to each question are given. The choice which you think is correct, fill that circle in front of that question with Marker or Pen ink in the answer book. Cutting or filling two or more circles will result in zero mark in that question.

Q1. The --------- layer that is in between of session layer and application layer:

(A) Network
(B) Transport
(C) Presentation
(D) Data link

Q2. Math Coprocessor is a:

(A) Software
(B) Special circuit
(C) Register
(D) Memory name

Q3. The currently selected cell in spreadsheet is called:

(A) Idle cell
(B) Active cell
(C) Passive cell
(D) Present cell

Q4. Software can be removed / installed through:

(A) Installer
(B) Control panel
(C) Debugger
(D) Linker

Q5. Smallest unit of memory is:

(A) Byte
(B) Bit
(C) Character
(D) Word

Q6. Making illegal copies of copyrighted software is called:

(A) Software piracy
(B) Collaboration
(C) Browsing
(D) Hacking

Q7. A collection of related web pages is called:

(A) Web page
(B) Website
(C) Exite
(D) Web server

Q8. The process of sending and receiving messages and files on internet is called:

(A) Transmission
(B) Messaging
(C) Electronic mail
(D) Internet

Q9. A cable consists of tubes of glass through which data are transmitted as pulse of light is called:

(A) Coaxial cable
(B) Twisted pair
(C) Fiber optic cable
(D) Coaxial tubes

Q10. Core area of system development process is called:

(A) Report
(B) Testing
(C) Coding
(D) Compiling

Q11. Temporary area within CPU is called:

(A) Register
(B) ROM
(C) RAM
(D) Cache Memory

Q12. Changing an existing document is called:

(A) Editing
(B) Entering
(C) Printing
(D) Typing

Q13. Office support system is enable to coordinate and manage the activities of:

(A) Workgroup
(B) Business
(C) Security
(D) Marketing

Q14. The number of time a wave repeats during a specific time period is called:

(A) Oscillation **(B)** Frequency

(C) Signals **(D)** Amplitude

Q15. Which of the computer component is responsible for computations of data:

(A) ALU **(B)** Control Unit

(C) Memory **(D)** ROM

Essay Type (Paper-I, Group-I)

Time Allowed: 2.10 hrs. | Maximum Marks: 60

QSECTION – I.

QQ.2. (Marks 12) Write short answers to any SIX (6) questions:

i How does light pen work?

ii How would you compare bit and byte?

iii What is the purpose of testing?

iv Define the term information technology.

v What is the function of presentation layer?

vi How would you describe Wide Area Network?

vii How would you define Word Art?

viii How would you create a table in MS-Word?

ix Differentiate between De-facto and De-Jure network standards.

QQ.3. (Marks 12) Write short answers to any SIX (6) questions:

i Define Broadband.

ii What is a modem?

iii How analog signals are different from digital signals?

iv Describe the importance of cache memory.

v What is the use of Memory Address Register?

vi Differentiate between One-Address and Two-Address instruction format.

vii Write down the steps involved in fetching an instruction in computer.

viii Differentiate between worksheet and workbook.

ix Write a function that returns the maximum number from cells A1 to C9.

QQ.4. **(Marks 12)** **Write short answers to any SIX (6) questions:**

i How banks can take benefit from the use of computer?

ii How computer can be used in offices?

iii What is the use of computer aided design?

iv How would you express antivirus software?

v How would you define privacy issue?

vi What is the purpose of Recycle Bin?

vii Write two purposes of an operating system.

viii Write any two uses of internet.

ix What do you know about website?

QSECTION-II. Note: Attempt any THREE questions.

QQ.5. Define software. Briefly describe the classification of softwares.

QQ.6. Define Computer Network. Discuss Client-Server and Peer-To-Peer Network Models.

QQ.7. What is meant by encoding of data? Explain any three coding schemes to represent data in computer.

QQ.8. Explain four types of CPU instructions.

QQ.9. Give your opinion about data security. Discuss any six ways of security violations.

Group II

Objective Type (Paper-II, Group-II)

Time Allowed: 20 Min. | Maximum Marks: 15

Note: Inter, Part II, 2022 Lahore Board. Four possible answers A, B, C and D to each question are given. The choice which you think is correct, fill that circle in front of that question with Marker or Pen ink in the answer book. Cutting or filling two or more circles will result in zero mark in that question.

Note: (MS-ACCESS)

Q1. How many table views are available in MS Access:

(A) 1 **(B)** 2

(C) 3 **(D)** 4

Q2. In relational database, a table is also called:

(A) Tuple
(B) Relation
(C) [illegible in source scan]
(D) [illegible in source scan]

Q3. CREATE command is used to create a:

(A) Table
(B) Form
(C) Report
(D) Query

Q4. In ERD model, the relationship between two entities is represented by a:

(A) Diamond symbol
(B) Rectangular box
(C) Oval symbol
(D) Line

Q5. Which of the following type of file require largest processing time:

(A) Sequential file
(B) Random file
(C) Indexed sequential file
(D) Direct access file

Q6. A database consists of various components called:

(A) Tool
(B) Properties
(C) Entities
(D) Object

Note: C-Language OR Visual Basic (C-Language)

Q7. Single line command starts with:

(A) #
(B) //
(C) */
(D) /*

Q8. Function prototypes for built-in functions are specified in:

(A) Source files
(B) Object files
(C) Header files
(D) Image files

Q9. Which of the following is the simplest form of a decision structure:

(A) If statement
(B) Switch
(C) If-else-if
(D) Nested if

Q10. The set of statement in curly braces in a loop is known as -------- of the loop:

(A) Title
(B) Header
(C) Center
(D) Body

Q11. Which of the following key is used to save a file:

(A) F2
(B) F3
(C) F4
(D) F5

Q12. On successful closing a file, the fclose () returns:

(A) Null
(B) 0 (zero)
(C) 1 (one)
(D) file pointer

Q13. The logical not operator, denoted by !, is a:

(A) Ternary operator
(B) Unary operator
(C) Binary operator
(D) Bitwise operator

Q14. a += b is equivalent to:

(A) b + a
(B) a = + b
(C) b = b + a
(D) a = a + b

Q15. Turbo C++ can compile:

(A) C++ programs only
(B) C and C++ programs
(C) Turbo C programs only
(D) Turbo C++ programs

Essay Type (Paper-II, Group-II)

Time Allowed: 2.10 hrs. | Maximum Marks: 60

QSECTION – I.

Note: (MS-ACCESS)

QQ.2. (Marks 12) Write short answers to any SIX (6) questions:

i What is entity? Give an example.

ii Write the responsibilities of data administrator.

iii Explain implementation.

iv List any four components of physical database design.

v Define referential integrity.

vi How partial dependency differs from transitive dependency?

vii Define any two layouts of form.

viii What is check boxes and radio buttons?

ix Describe any two bars of MS Access Application Window.

Note: C-Language

QQ.3. (Marks 12) Write short answers to any SIX (6) questions:

i Define statement terminator.

ii Differentiate between source code and object code.

iii Write the following statements as single statement. int x = 5; int y = 10; int z = 15;

iv Find the errors in the following code segment. int x, y, sum, z = x + y; printf ("sum = %d", z);

v What are comments?

vi Write the syntax of print function.

vii Write two difference between constant and variable.

viii Trace the errors in the following code segment void main ( ); { printf (OK) }

ix Predict the output of the following code segment. int n, a, b; n = 400; a = n% 100; b = n/ 10; n = n% 10; printf (" Result = %d %d %d", n,b,a); OR

Note: Visual Basic)

QQ.3. (Marks 12) Write short answers to any SIX (6) questions:

i Why would a programmer prefer to use high level language?

ii Find the error in the syntax private Sub Object Name- Dblclick ( ) Statements: endsub; end

iii What is the purpose of language processor?

iv Write the use of option explicit statement in VB.

v What is concatenation and when it would be used?

vi How can the user continue a very long basic statement to another line?

vii What is properties of Window?

viii Write three steps for creating VB projects.

ix Why Visual Basic is called even-driven language?

Note: C-Language

QQ.4. (Marks 12) Write short answers to any SIX (6) questions:

i Define compound statement.

ii Define while loop.

iii Predict the output. int a = 1 , b = 5 ; if (a + b) < 6) printf ("% d", b); printf ("% d", a + b);

iv Predict the output. int a; for (a = 1; a <= 10; a + +) printf ("% d", a);

v Convert the given program in do-while loop. int i; for (i = 3; i < - 39; i + = 6) printf ("%d\n", i);

vi What is function?

vii Define local variable?

viii Differentiate between Built-in functions and user defined functions.

ix What is text stream? OR

Note: (Visual Basic)

QQ.4. (Marks 12) Write short answers to any SIX (6) questions:

i Define selection structure.

ii What is Select — Case statement?

iii Write the syntax of IF—Then—Else statement.

iv Find the output of given code. a = 6 b = 7 if (a > b) then print a print b print (a + b) End

v What is post lest loop?

vi Re-write the given statement in while- wend.. for i = 1 to 10 print i Next

vii Enlist two types of sub-programs.

viii What is standard code module?

ix Differentiate between Exit Sub and Exit function.

QSECTION-II.

Note: (MS ACCESS)

Note: Note: Attempt any ONE question.

QQ.5. What is File? Explain File types from storage point of view.

QQ.6. How would you define a table? Also write characteristics of tables.

QSECTION – III. Note: Attempt any TWO descriptive answers (either from "C-Language" or from "Visual Basic") of the following questions. (C-Language)

QQ.7. What is meant by programming language? Discuss different types of programming languages.

QQ.8. Write a program that inputs three numbers and displays the maximum number by using if-else, if statement.

QQ.9. What is for loop? Write down syntax and working of for loop with example. OR (Visual-Basic)

QQ.7. What is meant by programming language? Discuss different types of programming languages.

QQ.8. Write a program in VB that inputs three numbers and displays the maximum number by using nested if statement.

QQ.9. What is for next loop? Write down syntax and working of for next loop with example.
