MCQs Tayyari presents

BISE Lahore

12th Class • Computer Science

Past Paper 2019

Group I & II • Objective + Subjective

Retyped faithfully from the original board paper — same questions, no changes.

mcqstayyari.online

Objective Type

Time Allowed: 20 Mins. | Maximum Marks: 15

Note: Four possible answers A, B, C and D to each question are given. The choice which you think is correct, fill that circle in front of that question with Marker or Pen ink in the answer-book. Cutting or filling two or more circles will result in zero mark in that question.

Note: Objective Type

Note: MS-ACCESS

Q1. The graphical query tool is known as:

(A) Query grid
(B) Design grid
(C) Query form
(D) Design form

Q2. Every relation should have:

(A) Primary key
(B) Candidate key
(C) Secondary key
(D) Mutually key

Q3. Which of the following can be a primary key:

(A) Last name
(B) Salary
(C) Customer ID
(D) Region

Q4. Which of the following is used to describe the characteristics of an object:

(A) Attribute
(B) Relationship
(C) Cardinality
(D) Modality

Q5. SQL stands for:

(A) Sort Query Language
(B) Self Query Language
(C) Seek Query Language
(D) Structured Query Language

Q6. Which of the following is not a database object:

(A) Table
(B) Query
(C) Query Report
(D) MS-Word

Note: C-Language OR Visual Basic

Note: C-Language

Q7. Switch statement is an alternate of:

(A) nested if
(B) if-else
(C) nested if-else
(D) if

Q8. Semicolon is placed at the end of condition in:

(A) while loop
(B) do-while loop
(C) for loop
(D) All of these

Q9. Which loop structure always executes at least once:

(A) do-while
(B) for
(C) while
(D) All of these

Q10. The scope of variable refers to its:

(A) Length
(B) Name
(C) Accessibility
(D) Data type

Q11. Variable and constant name can not contain:

(A) Number
(B) Underscore
(C) Letter
(D) Period

Q12. Which of the following character is used to mark the end of string:

(A) /o
(B) /r
(C) /a
(D) /n

Q13. The function that is used to display output on the screen is called:

(A) Printf **(B)** Scanf

(C) Pow **(D)** Display

Q14. The case block ends with:

(A) End Select **(B)** End Case

(C) break **(D)** Case Else

Q15. The output of the compiler is called:

(A) Library code **(B)** Source code

(C) Linked code **(D)** Object code

Note: Visual Basic

Q7. For A = 4 and B = 4, which of the following evaluates to true:

(A) A<>B **(B)** A<B

(C) A>=B **(D)** A>B

Q8. If step keyword is not used in For --- Next loop, counter variable is incremented by:

(A) 0 **(B)** 1

(C) 10 **(D)** Unknown

Q9. If number of iterations are not known is advance, the suitable loop is:

(A) Do---Loop Until **(B)** For---Next

(C) For---each Next **(D)** For---While

Q10. A two dimensional array can view as:

(A) One column **(B)** One row

(C) Row, column **(D)** None

Q11. Use---to declare variable in VB:

(A) Event **(B)** Identifier

(C) Sub **(D)** Dim

Q12. When no item is currently selected in a list box, the 'List Index' property is:

(A) -1 **(B)** +1

(C) 0 **(D)** Null

Q13. Which of the following is a valid VB data type:

(A) Boolean **(B)** Array

(C) Int **(D)** char

Q14. Another term used for making a decision is:

(A) Sequential **(B)** Repetition

(C) Selection **(D)** Iteration

Q15. Writing program in machine language is:

(A) Impossible **(B)** Simple

(C) Time consuming **(D)** Complex

Essay Type

Time Allowed: 2:10 Hours | Maximum Marks: 60

Note: Essay Type

Note: SECTION-I

Note: MS-ACCESS

Q2. (Marks 12) Write short answers to any SIX (6) questions.

(i) What is the use of query language?

(ii) What is the use of DDL?

(iii) List different types of keys.

(iv) Define entity.

(v) What is functional dependency?

(vi) When is a relation in 3NF?

(vii) What do you mean by IDE?

(viii) How is criteria specified in a query?

(ix) State the purpose of subform.

Note: C-Language

Q3. (Marks 12) Write short answers to any SIX (6) questions.

(i) Define the term Linking.

(ii) What is compiler?

(iii) List two keywords in C Language.

(iv) Define standard output.

(v) Write a statement to declare an integer variable i initialized to 10.

(vi) Determine the output int number = 6; printf ("%d/n", number++);

(vii) Find the errors int n = 4.2.

(viii) Write the code to input a value for an integer n.

(ix) Determine the output printf("Hello /n World /n Pakistan");

Note: OR

Note: Visual Basic

Q3. (Marks 12) Write short answers to any SIX (6) questions.

(i) Define the term Linking.

(ii) What is comiler? [sic, print for 'compiler']

(iii) List two keywords in V.B.

(iv) Define standard output.

(v) Write a statement to declare an integer variable i initialized to 10.

(vi) Determine the output Dim number = 10 as integer MsgBox (number)

(vii) Find the errors Dim n = 4.2 as integer

(viii) Write the code to input a value for an integer n.

(ix) Determine the output MsgBox ("Hello World")

Note: C-Language

Q4. (Marks 12) Write short answers to any SIX (6) questions.

(i) Define compound statement.

(ii) Why is the sentinel value used in loop?

(iii) Convert the following conditional expression into if-else statement: x < 0 ? y = 00 : z = 20;

(iv) Determine the output of following code: if (1 ! =2) ptintf [sic, print for 'printf']("OK"); else ptintf [sic]("Correct it"):

(v) Convert the following code in do-while loop: for (i = 1 ; i < = 5 ; i + +) printf (" /n % d", i);

(vi) Write the output of the following code: int i , j = 3; for (i = 1 ; i < = 5 ; i + +) printf (" / n % d % d" , i, j);

(vii) What is function definition?

(viii) What is the use of actual parameter?

(ix) How is a file closed?

Note: OR

Note: Visual Basic

Q4. (Marks 12) Write short answers to any SIX (6) questions.

(i) What is the use of NOT operator?

(ii) What is Select--- Case statement?

(iii) Differentiate between TO and IS keywords in Case form.

(iv) When should you use Do Until loop?

(v) What is counter variable?

(vi) How is subscript variable written?

(vii) What is the use of dynamic array?

(viii) List any two styles of combo box.

(ix) What do you know about checkbox?

Note: SECTION-II

Note: MS ACCESS

Note: Note: Attempt any ONE question.

Q5. Define ER Diagram. Explain it with the help of an ex[illegible in source scan]

Q6. Discuss any four methods of modifying a table in MS Access.

Note: SECTION-III

Note: Note: Attempt any TWO descriptives answers (either from "C-Language" or from "Visual Basic") of the following questions.

Note: C-Language

Q7. (Marks 8) Describe characteristics of High Level Language.

Q8. (Marks 8) What is Switch Statement? Write its syntax, draw flow chart and explain its working.

Q9. (Marks 8) **Write a program that inputs a number from theuser [sic, print for 'the user'] and displays the factorial of that number.**

Note: OR

Note: Visnal Basic [sic, print for 'Visual Basic']

Q7. (Marks 8) **Describe characteristics of High Level Language.**

Q8. (Marks 8) **What is Select---Case structure? Write its syntax, draw flow chart and explain its working.**

Q9. (Marks 8) **Write a program that inputs a number form [sic, print for 'from'] the user and displays the factorial of that number.**
