BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, GUJRANWALA

INTERMEDIATE (11TH CLASS) EXAMINATION, 2024

COMPUTER SCIENCE

Past Paper 2024 • Paper Code: 6833 / 6838

Retyped faithfully from the original board paper — same questions, no changes.

GROUP – I

Computer Science (Intermediate Part-I) Paper : I (Objective Type)

Time Allowed: 20 Minutes | **Maximum Marks:** 15 | **Paper Code:** 6833

Note: Note: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, fill that circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

Q1. 1 - The idea of storing of program in memory was given by

(A) Charles Babbage
(B) Liebnitz
(C) Pascal
(D) John Van Neumann

Q2. The temporary storage area within CPU is called

(A) Registers
(B) RAM
(C) ROM
(D) Disk

Q3. A secret word or numbers to be typed on a keyboard before any activity can take place are called

(A) Data Encryption
(B) Password
(C) Biometric data
(D) private data

Q4. The devices that are automatically detected by Windows Operating System are called

(A) serial devices
(B) parallel devices
(C) automatic devices
(D) plug and play devices

Q5. Which of the following is Word Processor?

(A) Adobe Acrobat
(B) Photo Express
(C) MS Word
(D) MS Excel

Q6. If you want to display the sum of five cells (A1 to A5), the function is

(A) = sum(A1:A5)
(B) = sum(A1 to A5)
(C) = sum(A1,A5)
(D) = sum(A1+A5)

Q7. If the custom format is ##,### then 51243 will be displayed as

(A) 5,1243
(B) 51,243
(C) 512,43
(D) 5124,3

Q8. Which of the following protocol is used to access Internet?

(A) Ethernet
(B) ARCnet
(C) FTP
(D) TCP/IP

Q9. Which device is used to read the vertical lines from the product in a Super Store?

(A) OMR (Optical Mark Recognition)
(B) OCR (Optical Character Recognition)
(C) Bar – Code Reader
(D) MiCR (Magnetic ink Character Recognition)

Q10. An input device, which is used for playing computer games

(A) light pen
(B) joy stick
(C) mouse
(D) scanner

Q11. In which topology nodes are connected to a single cable

(A) Bus Topology
(B) Ring Topology
(C) Star Topology
(D) Mesh Topology

Q12. The unique address of every web page on www is called

(A) Web Address
(B) IP Address
(C) URL
(D) Website Address

Q13. The process of transferring data electronically from one place to another is called

(A) Data processing
(B) Data Communication
(C) Data Synchronization
(D) Data Sequencing

Q14. How many characters ASCII 7–Bit code represents?

(A) 128
(B) 256
(C) 512
(D) 1024

Q15. SUPARCO department gives information about

(A) robot
(B) airline
(C) weather
(D) train

Computer Science (Intermediate Part-I) Paper : I (Subjective Type)

Time Allowed: 2.10 hours | **Maximum Marks:** 60

Note: Section-I is compulsory. Attempt any THREE (3) questions from Section-II.

Q2. (Marks (2 x 6 = 12)) Write short answers to any SIX questions.

i - Give two applications of OMR.

ii - Convert 240 MB of memory into bytes and kilobytes.

iii - Write down two benefits of E-mail.

iv - Briefly define ARPANET.

v - Define the function of Network Interface Card (NIC)

vi - What is Metropolitan Area Network?

vii - State two services of Application Layer.

viii - How data is represented in computers?

ix - What is Broadband?

Q3. (Marks (2 x 6 = 12)) Write short answers to any SIX questions.

i - Distinguish between CX and DX registers.

ii - What is the use of MAR register?

iii - Why RAM is called Volatile Memory?

iv - Elaborate the concept of memory buffer register.

v - How does boot sector virus work?

vi - Define the term Backup.

vii - Define Antivirus software.

viii - Elaborate the purpose of search engine.

ix - How web pages are created?

Q4. (Marks (2 x 6 = 12)) Write short answers to any SIX questions.

i - Write down two typing modes in MS-Word.

ii - Why we use Margins of document in MS-Word?

iii - Describe Undo and Redo commands of MS-Word?

iv - What is Thesaurus in MS-Word?

v - Change the relative reference C1 into absolute reference.

vi - Write Excel function to add values in Cells B5 to B15.

vii - What do you mean by function in MS-Excel?

viii - What is cell in MS-Excel?

ix - Write the concept of 3D-worksheets of MS-Excel.

> Note: SECTION – II

Q5. (Marks (8)) Define display screen. Explain its types.

Q6. (Marks (8)) Explain serial and parallel transmission. Also discuss two types of serial transmission.

Q7. (Marks (8)) Explain any four uses of computer in medical field.

Q8. (Marks (8)) Define Bus interconnection. Explain different types of system buses.

Q9. (Marks (8)) Discuss any four (04) objects of Windows Operating System.

GROUP – II

Computer Science (Intermediate Part-I) Paper : I (Objective Type)

Time Allowed: 20 Minutes | **Maximum Marks:** 15 | **Paper Code:** 6838

> Note: Note: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, fill that circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

Q1. 1 - Formula can only be applied on

(A) values
(B) labels
(C) unmerged cells
(D) blank cells

Q2. Which is the physical path over which a message travels

(A) protocol
(B) signal
(C) medium
(D) encoder

Q3. Arial font is an example of

(A) Serif
(B) Sans – Serif
(C) Italic
(D) Times New Roman

Q4. Which of the following is an absolute address

(A) A1
(B) A1$
(C) A1
(D) #,A1

Q5. The most commonly used device as main memory

(A) SRAM
(B) DRAM
(C) Cache
(D) MRAM

Q6. The common name used for input and output devices is

(A) QWERTY
(B) Mechanical devices
(C) peripheral
(D) Electrical devices

Q7. Which type of virus is activated on specific date and time?

(A) Boot Sector
(B) Logic bomb
(C) Chernobal
(D) Trojan Horse

Q8. Which of the following maintain a print queue for all printing jobs?

(A) Windows Operating System
(B) printer
(C) print jobs
(D) package software

Q9. Another name for RAM is

(A) Main memory
(B) ROM
(C) BIOS
(D) Non-volatile memory

Q10. One Giga Byte is equal to

(A) 2^{10} bytes
(B) 2^{15} bytes
(C) 2^{20} bytes
(D) 2^{30} bytes

Q11. How many characters are represented by ASCII – 8 code?

(A) 128
(B) 256
(C) 286
(D) 312

Q12. Which domain is used for non-profitable organizations?

(A) .com
(B) .edu
(C) .gov
(D) .org

Q13. The media access control sub layer resides in which layer?

(A) Physical
(B) Data link
(C) Network
(D) Transport

Q14. An automatic programmable machine used in industry is called

(A) CAD
(B) CAM
(C) CAT
(D) ROBOT

Q15. FDDI is used in which topology?

(A) Ring (B) Star

(C) Mesh (D) Bus

Computer Science (Intermediate Part-I) Paper : I (Subjective Type)

Time Allowed: 2.10 hours | **Maximum Marks:** 60

Note: Section-I is compulsory. Attempt any THREE (3) questions from Section-II.

Q2. (Marks (2 x 6 = 12)) Write short answers to any SIX questions.

i - Define SDLC.

ii - Convert 240 MB of memory into Kilobytes.

iii - Write down any two benefits of E-mail.

iv - Define TCP/IP.

v - What is Peer–to–Peer Network model?

vi - State the function of Physical Layer.

vii - Distinguish between De Facto Standard and De Jure Standard.

viii - Which type of signals are commonly called baseband?

ix - What is transmission rate of modem?

Q3. (Marks (2 x 6 = 12)) Write short answers to any SIX questions.

i - Define PC register.

ii - Define Cache Memory.

iii - What is the importance of instruction set?

iv - What do you mean by stored program computer?

v - Write down four causes of computer viruses.

vi - Define the term Biometric.

vii - What is data security?

viii - Write down any four limitations of e-mail.

ix - Define search engine. Write down at least two examples.

Q4. (Marks (2 x 6 = 12)) Write short answers to any SIX questions.

i - Write down the use of clipboard.

ii - Write down the use of Macros in MS-Word.

iii - Write down two uses of Word Processor.

iv - Define page margins and page size in MS-Word processor.

v - Write down the formula for calculating average of three numbers.

vi - Write down an example of MAX( ) function within cell address in MS-Excel.

vii - What is Relative Reference?

viii - Define 3-D sheet in MS-Excel.

ix - What is Active cell?

> Note: SECTION – II

Q5. (Marks (8)) What is Software? Write down different types of software.

Q6. (Marks (8)) What is un-guided media? Briefly describe different un-guided media.

Q7. (Marks (8)) What is meant by an Office Automation? Explain various tasks to be performed in an Office.

Q8. (Marks (8)) What is ROM? Write down its different types.

Q9. (Marks (8)) What is the purpose of mouse and keyboard? Write down important events of mouse and keyboard.
