BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, PESHAWAR

INTERMEDIATE (11TH CLASS) EXAMINATION, 2024

BIOLOGY

Past Paper 2024 • Paper Code: PR–XI (A-I-A) (24)

Retyped faithfully from the original board paper — same questions, no changes.

SECTION-A

Time Allowed: 20 Minutes | **Maximum Marks:** 18 | **Paper Code:** PR–XI (A-I-A) (24)

۱۔ ہر سوال کے سامنے چار دائرے دیے گئے ہیں۔ صرف صحیح جواب والا دائرہ بھر دیں۔ ۲۔ دائروں کو شیڈ (بھرنے) کے لیے نیلے یا کالے رنگ کا پین استعمال کریں۔ ۳۔ جواب میں ایک سے زائد دائرے بھرنے سے جواب غلط تصور ہوگا۔

Q1. Sensitive material like vaccines and enzymes are sterilized by:

(A) Filtration
(B) Incineration
(C) Desiccation
(D) Refrigeration

Q2. All animals like protists are collectively known as:

(A) Heteropophs
(B) Parasites
(C) Saphrophytes
(D) Autotrophs

Q3. In___type of inflorescence the flowers appears to arise from same point.

(A) Spike
(B) Panicle
(C) Umbel
(D) Catkin

Q4. An outgrowth present at the base of sporophylls in the strobilli of Lycopsida is termed as:

(A) Ligule
(B) Zygospore
(C) Bud
(D) Gall

Q5. The members of phylum porifera perform excretion by:

(A) Malpigian tubules
(B) Nephridia
(C) Nephron
(D) Diffusion

Q6. Evaporation from leaves in plants is responsible for:

(A) Nutrition
(B) Transpiration pull
(C) Transportation
(D) Translocation

Q7. Ceacum is a part of:

(A) Colon
(B) Small intestine
(C) Large intestine
(D) Appendix

Q8. Flow of blood in the capillaries are adjusted by:

(A) Valves
(B) Septum
(C) Pores
(D) Pre-capillary sphincter

Q9. Which cell in immune system directly kill microbes?

(A) Cytotoxic-T-Cells
(B) Helper-Cells
(C) Suppressor T-Cells
(D) Blood Cells

Q10. Ribosome can be divided into Prokaryotic and Eukaryotic on the basis of:

(A) Composition
(B) Structure
(C) Sedimentation
(D) Function

Q11. If glucose concentration in the cell is proper, cell membrane will NOT allow___ to enter the cell.

(A) Water
(B) Salts
(C) Glucose
(D) Ions

Q12. Select the monomer from the given:

(A) Keratin
(B) Albumin
(C) Lysine
(D) Insulin

Q13. In RNA, uracil occurs instead of:

(A) Adenine
(B) Thymine
(C) Cytosine
(D) Guanine

Q14. The name of pepsin enzyme is an exceptional case related to enzymes nomenclature on the basis of:

(A) Substrate
(B) Mode of enzymes action
(C) Catalyzation
(D) Active site

Q15. Ribolose biphosphate is used by plants in the fixation of:

(A) Carbon
(B) Hydrogen
(C) Oxygen
(D) Water

Q16. Anaerobic respiration produces ____ ATPs from the breakdown of one glucose molecule.

(A) 1 (B) 2

(C) 3 (D) 15

Q17. Which one is the non-living character of virus?

(A) Mutation (B) Posses DNA

(C) Non-cellular structure (D) Cause infection

Q18. Methanogeus archea may be found living in

(A) Hot springs (B) Salt lakes

(C) Volcanic springs (D) Marshes

SECTION-B

Time Allowed: 2 Hours 40 Minutes | **Maximum Marks:** 40

Note: Note: Time allowed for Section – B and Section – C is 2 Hours and 40 minutes.

Q2. Attempt any TEN parts. Each part carries FOUR marks.

i) Enlist the names of organelles fund in Eukaryotic Cell.

ii) Give a brief description about waxes and Terpenoids?

iii) Categorize enzymes inhibitors into competitive and noncompetitive with examples?

iv) State about the location, structure, types and role of photosystems in chloroplasts?

v) Compare Hepatitis and AIDs?

vi) Give a description about the process and reasons of endospore formation in bacteria?

vii) Write about the features of Basidiomycota?

viii) Define stamen and carpel and write any two differences in both.

ix) Illustrate about diploblastic and triploblastic organization in animals briefly.

x) List the macro nutrient in plants and write one function to each.

xi) Differentiate between the structure and functions of stomach and intestine in human.

xii) Summarise about the electrical activities of heart due to SA node, AV node and Parkinji Fibers.

xiii) Mention briefly about the onset of Pyrexia (Fever).

SECTION-C

Time Allowed: 2 Hours 40 Minutes | **Maximum Marks:** 27

Note: Note: Attempt any THREE questions. All questions carry equal marks.

Q3.

(a) Discuss the structure and function of Golgi bodies?

(b) Explain how enzyme bring energy changes during a chemical reaction?

Q4.

(a) Explain Kreb Cycle in detail.

Q5.

(a) Discuss the importance of Fungi in pharmaceutical industry.

(b) Illustrate about Auxins and Gibberellins as growth substances in plants.

Q6.

(a) Discuss the structure of human heart.

(b) Explain about antibody mediated immune response briefly.
