BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, SAHIWAL

INTERMEDIATE (12TH CLASS) EXAMINATION, 2023

COMPUTER SCIENCE

Past Paper 2023 • Paper Code: 8835

Retyped faithfully from the original board paper — same questions, no changes.

Computer Science - Paper: II - Objective (iii)

Time Allowed: 20 Minutes | **Maximum Marks:** 15 | **Paper Code:** 8835

Note: Note: - You have four choices for each objective type question as A, B, C and D. The choice which you think is correct; fill that circle in front of that question number in your answer book. Use marker or pen to fill the circles. Cutting or filling up two or more circles will result no mark.

Note: SECTION-A (MS-ACCESS)

Q1. Different attributes in two different tables having same name are called:

(A) Synonym
(B) Homonym
(C) Acronym
(D) Mutually exclusive

Q2. Customers, cars and parts are examples of:

(A) Entities
(B) Attributes
(C) Cardinale
(D) Relationships

Q3. Which of the given is also known as control key?

(A) Sort key
(B) Composite key
(C) Candidate key
(D) Primary key

Q4. A collection of related fields is called:

(A) Character
(B) Record
(C) Database
(D) File

Q5. Which of the given is used to retrieve data from database and represent it to user in a formatted way?

(A) Report
(B) Form
(C) Query
(D) Table

Q6. Which wild card replaces one character only?

(A) *
(B) ?
(C) :
(D) !

> Note: C-LANGUAGE

Q7. The value of C expression 9/5*2 is:

(A) 3.6
(B) 0.9
(C) 0
(D) 2

Q8. How many bytes are occupied by the statement : float a,b;

(A) 1
(B) 4
(C) 8
(D) 16

Q9. Logical NOT operator, denoted by ! is a:

(A) Ternary operator
(B) Bitwise operator
(C) Binary operator
(D) Unary operator

Q10. The .exe file is produced by?

(A) Linker
(B) Loader
(C) Compiler
(D) Interpreter

Q11. Which of the given is the native language of computer?

(A) C-Language
(B) Pascal
(C) Machine language
(D) DOS

Q12. The process of sending an argument to a function is called:

(A) sending
(B) filtering
(C) delivering
(D) passing

Q13. Which of the given loop is not available in C language?

(A) while wend
(B) while
(C) do while
(D) for

Q14. The case block ends with:

(A) End select
(B) End case
(C) break
(D) Case Else

Q15. The functions used for input and output is stored in:

(A) stdio.h
(B) conio.h
(C) math.h
(D) inout.h

Note: OR (VISUAL-BASIC)

Q7. For A=4 and B=4, which of the given one evaluates to true?

(A) A<>B
(B) A<B
(C) A>B
(D) A>=B

Q8. Which of the given is valid assignment statement?

(A) 100=a
(B) c+d=a+b
(C) a=100
(D) 4=6

Q9. Which operators are used to compare operands?

(A) Arithmetic
(B) Logical
(C) Syntax
(D) Relational

Q10. The expression 3 mod 5 has a value equal to:

(A) 3
(B) 5
(C) 0
(D) 0.6

Q11. Which operator is only used for string concatenation?

(A) Plus sign (+)
(B) Underscore (_)
(C) Ampersand (&)
(D) "and"

Q12. The loop that never ends is called:

(A) Continuous loop
(B) Running loop
(C) Nested loop
(D) Infinite loop

Q13. One execution of loop is known as:

(A) Iteration
(B) cycle
(C) Duration
(D) Test

Q14. Which statement is used in For-Next loop for early termination of loop?

(A) Exit
(B) Exit Do
(C) Exit For
(D) break

Q15. Which of the given is used for making two way decision?

(A) If-else
(B) If
(C) Nested if
(D) switch

Computer Science - Paper: II - Subjective

Time Allowed: 2:10 Hours | **Maximum Marks:** 60

> Note: SECTION-B

Q2.. (Marks 12) Write short answers to any Six parts. MS-ACCESS (6 x 2 = 12)

i. Define the term data integration.

ii. What is the purpose of views in MS Access?

iii. Define the term entity.

iv. What is referential integrity?

v. Define transitive dependency.

vi. Differentiate between form and report.

vii. Write any two advantages of query.

viii. Write use of OLE object in MS Access.

ix. List different layout of form.

Q3.. (Marks 12) Write short answers to any Six parts from "C-Language" OR "Visual Basic". (6 x 2 = 12)

C-LANGUAGE i. Write the role of preprocessor directive. ii. What is main function? iii. Define bug and debugging. iv. Which type of error is difficult to trace and why? v. Write the output of the code; Printf("value=%d",4-1); vi. Describe L value and R value. vii. What will be the value of x and y ? if x=7: y=x++; viii. Find the errors: Int a,i =20; Printf ["%d",b]; ix. Illustrate difference between text and binary streams.

Visual Basic i. Define visual programming. ii. What is default Event handler? iii. Describe Mouse Move Event. iv. Define Got Focus Event. v. Discuss cls method of Form. vi. What is Caption property? vii. Differentiate between properties and methods. viii. Discuss the method of assigning properties at run time. ix. Define Hexadecimal values from property window.

Q4.. (Marks 12) Write short answers to any Six parts from "C-Language" OR "Visual Basic". (6 x 2 = 12)

C-LANGUAGE i. Write down the use of "getch" function. ii. What is the use of format specifiers in C language? iii. Determine the output of the following code segment: Void main () { printf("555\t"); printf ("999"); printf ("\n 444"); } iv. How are instructions executed in sequence structure? v. Determine the output of the following code segment: if(2==4) printf("PUNJAB"); else printf("KPK"); vi. Write the following expression in C: w is either equal to 6 or not greater than 3. vii. Write the syntax of while loop. viii. Define infinite loop. ix. Convert the following for loop into while loop. for(i=1; i <=5 i ++) printf ("ok");

Visual Basic i. Write two advantages of list Box? ii. How Combo box is used? iii. What is image control? iv. In which situation scrollbar is used? v. How line control is used? vi. What

is timer? vii. Why loops are important in programming language in VB. viii. What is frame? ix. What is Active x control?

> Note: SECTION-C (Note: - Attempt any One question. MS-ACCESS) (8x1=8)

Q5.. (Marks 8) Define database model. Explain different types of database models.

Q6.. (Marks 8) Explain physical Database design process.

> Note: SECTION-D (Note: - Attempt any Two questions from "C-Language" OR "Visual Basic".) (8x2=16)

C-LANGUAGE 7. What is control structure? Briefly describe the basic control structures for writing programs. 8. Write a program in C-language to print the given series. 0 3 6 9 12 15 by using loop. 9. Write short note on the following: (a) Functions without arguments. (b) Functions that return a value and accept arguments.

Visual Basic 7. What is control structure? Briefly describe the basic control structures for writing programs. 8. Write a program in VB language to print the given series. 0 3 6 9 12 15 by using loop. 9. Write short note on the following: (a) Functions without arguments (b) Functions that return a value and accept arguments
