Computer Science

100 Original MCQs with Answers & Explanations

About this book

Computer fundamentals, hardware and memory, operating systems, MS Office, the internet and the shortcuts that save minutes in the exam hall. Every question in this book is original and every answer is explained in one clear line.

How to use this book

Attempt each question honestly before reading the answer printed below it. The correct option is marked in the green box, followed by a short explanation — read the explanation even when you were right, because that one line is the fact the examiner is testing. When you finish, check yourself against the answer key at the end and note the topics you missed.

Original content

Every question in this book is an original work, written exclusively for MCQs Tayyari. No question has been copied from any book, website or question bank. You may print this ebook for your own study; please do not redistribute it commercially.

Q1. Which part of the computer is called its brain?

A) Monitor
B) Central Processing Unit (CPU)
C) Keyboard
D) Printer

✓ **Answer: B) Central Processing Unit (CPU)**

The CPU executes all instructions, so it is called the brain of the computer.

Q2. One kilobyte (KB) is equal to:

A) 2048 bytes
B) 512 bytes
C) 1024 bytes
D) 1000 bytes

✓ **Answer: C) 1024 bytes**

1 KB = 2^10 = 1024 bytes.

Q3. Which of the following is an input device?

A) Speaker
B) Printer
C) Monitor
D) Scanner

✓ **Answer: D) Scanner**

A scanner feeds data into the computer, so it is an input device.

Q4. Which memory loses its data when the power is switched off?

A) RAM
B) CD-ROM
C) ROM
D) Hard disk

✓ **Answer: A) RAM**

RAM is volatile memory; its contents disappear when power goes off.

Q5. The smallest unit of data in a computer is the:

A) Nibble
B) Bit
C) Byte
D) Word

✓ **Answer: B) Bit**

A bit is a single 0 or 1, the smallest unit of data.

Q6. Which of the following is system software?

A) Photoshop
B) MS Word
C) Operating system
D) Web browser

✓ **Answer: C) Operating system**

System software manages hardware; the operating system is its main example.

Q7. Which of the following is an output device?

A) Keyboard
B) Scanner
C) Mouse
D) Printer

✓ **Answer: D) Printer**

A printer sends processed data out of the computer.

Q8. ROM stands for:

A) Read Only Memory
B) Rapid Open Memory
C) Random Only Memory
D) Run On Memory

✓ **Answer: A) Read Only Memory**

ROM holds permanent startup instructions of a computer.

Q9. Which storage device usually has the largest capacity?

A) DVD
B) Hard disk drive
C) Floppy disk
D) Compact disc (CD)

✓ **Answer: B) Hard disk drive**

Hard disk drives store far more data than CDs, DVDs or floppy disks.

Q10. The ALU inside the CPU is responsible for:

A) Connecting to the internet
B) Displaying output
C) Arithmetic and logical operations
D) Storing files

✓ **Answer: C) Arithmetic and logical operations**

The Arithmetic Logic Unit performs calculations and comparisons.

Q11. Which of the following is NOT hardware?

A) Printer
B) Mouse
C) Monitor
D) Spreadsheet software

✓ **Answer: D) Spreadsheet software**

Spreadsheet software is a program, so it is software, not hardware.

Q12. One byte is made up of:

A) 8 bits
B) 16 bits
C) 2 bits
D) 4 bits

✓ **Answer: A) 8 bits**

A byte is a group of 8 bits.

Q13. Which of the following is an operating system?

A) Microsoft Word
B) Microsoft Windows
C) Google Chrome
D) Adobe Reader

✓ **Answer: B) Microsoft Windows**

Windows manages the computer's hardware and runs programs.

Q14. Linux is best described as:

A) An antivirus program
B) A web browser
C) An open-source operating system
D) A paid word processor

✓ **Answer: C) An open-source operating system**

Linux is a free, open-source operating system.

Q15. The Windows tool used to view and close running programs is:

A) Control Panel
B) Command Prompt
C) File Explorer
D) Task Manager

✓ **Answer: D) Task Manager**

Task Manager shows running apps and lets you end unresponsive ones.

Q16. Which operating system was developed by Google?

A) Android
B) iOS
C) Ubuntu
D) MS-DOS

✓ **Answer: A) Android**

Android is Google's operating system for mobile devices.

Q17. The first screen you see after a computer boots is called the:

A) Window
B) Desktop
C) Icon
D) Taskbar

✓ **Answer: B) Desktop**

The desktop is the main screen shown after startup.

Q18. The process that prepares a computer for use when it is switched on is called:

A) Compiling
B) Formatting
C) Booting
D) Scanning

✓ **Answer: C) Booting**

Booting loads the operating system into memory at startup.

Q19. A file deleted after the Recycle Bin is emptied:

A) Moves to My Documents
B) Is sent to the cloud
C) Gets compressed automatically
D) Cannot be recovered from the Bin

✓ **Answer: D) Cannot be recovered from the Bin**

Once the Recycle Bin is emptied, the deleted files are gone permanently.

Q20. Which file system is standard on modern Windows computers?

A) NTFS
B) EXT4
C) APFS
D) HFS+

✓ **Answer: A) NTFS**

NTFS is the standard file system used by Windows.

Q21. Which of the following is NOT an operating system?

A) MS-DOS
B) Microsoft Excel
C) macOS
D) Linux

✓ **Answer: B) Microsoft Excel**

Excel is spreadsheet software, not an operating system.

Q22. Multitasking in an operating system means:

A) Connecting two users to one PC
B) Running two antiviruses
C) Running several programs at the same time
D) Using two computers together

✓ **Answer: C) Running several programs at the same time**

Multitasking lets the operating system handle multiple programs at once.

Q23. In MS Word, Ctrl+S is used to:

A) Select all text
B) Print the document
C) Open a document
D) Save the document

✓ **Answer: D) Save the document**

Ctrl+S saves the current document.

Q24. Which shortcut pastes copied text in MS Office?

A) Ctrl+V
B) Ctrl+X
C) Ctrl+P
D) Ctrl+C

✓ **Answer: A) Ctrl+V**

Ctrl+V pastes the last copied or cut item.

Q25. In MS Excel, a cell address is made of:

A) A column letter only
B) A column letter and a row number
C) A row number only
D) The sheet name only

✓ **Answer: B) A column letter and a row number**

Each cell is identified like B5: column letter plus row number.

Q26. Which Excel function adds up a range of values?

A) AVERAGE
B) COUNT
C) SUM
D) MAX

✓ **Answer: C) SUM**

The SUM function totals all the numbers in a range.

Q27. In MS PowerPoint, pressing F5:

A) Closes the file
B) Saves the presentation
C) Inserts a new slide
D) Starts the slideshow

✓ **Answer: D) Starts the slideshow**

F5 starts the slideshow from the first slide.

Q28. The default file extension of MS Word 2016 documents is:

A) .docx
B) .doc
C) .pdf
D) .txt

✓ **Answer: A) .docx**

Word 2007 and later save documents as .docx by default.

Q29. Which alignment makes text even on both the left and right margins?

A) Right
B) Justify
C) Center
D) Left

✓ **Answer: B) Justify**

Justify spreads text evenly between both margins.

Q30. In Excel, the intersection of a row and a column is called a:

A) Range
B) Box
C) Cell
D) Field

✓ **Answer: C) Cell**

A cell is where one row and one column meet.

Q31. In MS Office, Ctrl+Z is used to:

A) Cut text
B) Redo an action
C) Zoom the view
D) Undo the last action

✓ **Answer: D) Undo the last action**

Ctrl+Z reverses the most recent action.

Q32. Which Excel function counts only cells containing numbers?

A) COUNT
B) AVERAGE
C) COUNTA
D) SUMIF

✓ **Answer: A) COUNT**

COUNT counts the numeric entries in a range.

Q33. The .pptx extension belongs to files created in:

A) MS Excel
B) MS PowerPoint
C) MS Access
D) MS Word

✓ **Answer: B) MS PowerPoint**

.pptx is the standard format for PowerPoint presentations.

Q34. Which Word feature automatically fixes common typing mistakes?

A) Thesaurus
B) Mail Merge
C) AutoCorrect
D) Word Count

✓ **Answer: C) AutoCorrect**

AutoCorrect replaces common misspellings as you type.

Q35. In MS Word, Ctrl+B makes selected text:

A) Coloured
B) Underlined
C) Italic
D) Bold

✓ **Answer: D) Bold**

Ctrl+B applies bold formatting to the selected text.

Q36. Every formula in Excel must begin with:

A) An equal sign (=)
B) A dollar sign ($)
C) A plus sign (+)
D) A hash sign (#)

✓ Answer: A) An equal sign (=)

Excel treats a cell entry as a formula only if it starts with =.

Q37. In an Excel formula, A1 is an example of:

A) A named range
B) An absolute cell reference
C) A mixed cell reference
D) A relative cell reference

✓ Answer: B) An absolute cell reference

Dollar signs lock both the column and the row, making the reference absolute.

Q38. URL stands for:

A) Unique Reference Line
B) United Resource Location
C) Uniform Resource Locator
D) Universal Record Link

✓ Answer: C) Uniform Resource Locator

A URL gives the address of a resource on the web.

Q39. Which device connects different networks and directs data between them?

A) Printer
B) Modem
C) Scanner
D) Router

✓ Answer: D) Router

A router forwards data packets between networks.

Q40. WWW stands for:

A) World Wide Web
B) Web World Wide
C) Wide World Web
D) World Web Wide

✓ Answer: A) World Wide Web

The World Wide Web is the system of linked web pages.

Q41. An IP address is used to:

A) Store backup files
B) Identify a device on a network
C) Speed up downloads
D) Block computer viruses

✓ **Answer: B) Identify a device on a network**

Every device on a network gets a unique IP address for identification.

Q42. Which of the following is a web browser?

A) Windows
B) Gmail
C) Google Chrome
D) Facebook

✓ **Answer: C) Google Chrome**

Chrome is a web browser used to open websites.

Q43. Email messages with attachments are sent over the internet using:

A) FTP
B) HTML
C) HTTP
D) SMTP

✓ **Answer: D) SMTP**

SMTP is the standard protocol for sending email.

Q44. HTTP stands for:

A) HyperText Transfer Protocol
B) High Transfer Text Protocol
C) Hyper Terminal Transport Process
D) Host Transfer Text Protocol

✓ **Answer: A) HyperText Transfer Protocol**

HTTP is the protocol used to load web pages.

Q45. Which network type typically covers a single building or campus?

A) Internet
B) LAN
C) MAN
D) WAN

✓ **Answer: B) LAN**

A Local Area Network connects devices in a small area.

Q46. Wi-Fi is a technology for:

A) Bluetooth printing
B) Satellite television
C) Wireless networking
D) Wired internet

✓ **Answer: C) Wireless networking**

Wi-Fi connects devices to a network without cables.

Q47. In an email address, the @ symbol separates the:

A) CC and BCC fields
B) Sender and the receiver
C) Subject and the body
D) Username and the domain name

✓ **Answer: D) Username and the domain name**

An email address is written as username@domain.

Q48. Which of the following is a search engine?

A) Google
B) YouTube
C) WhatsApp
D) Instagram

✓ **Answer: A) Google**

Google is a search engine for finding web pages.

Q49. ISP stands for:

A) Internal System Process
B) Internet Service Provider
C) Intranet Security Protocol
D) International Software Program

✓ **Answer: B) Internet Service Provider**

An ISP is the company that provides your internet connection.

Q50. The binary number 1010 equals which decimal number?

A) 8
B) 12
C) 10
D) 9

✓ **Answer: C) 10**

1010 = 8 + 2 = 10 in decimal.

Q51. Which number system uses only the digits 0 and 1?

A) Hexadecimal
B) Decimal
C) Octal
D) Binary

✓ Answer: D) Binary

Binary is the base-2 system used inside computers.

Q52. The decimal number 7 written in binary is:

A) 111
B) 101
C) 110
D) 100

✓ Answer: A) 111

111 = 4 + 2 + 1 = 7 in decimal.

Q53. How many bits are there in one nibble?

A) 8
B) 4
C) 2
D) 16

✓ Answer: B) 4

A nibble is half a byte, i.e. 4 bits.

Q54. The binary equivalent of decimal 15 is:

A) 1001
B) 1010
C) 1111
D) 1110

✓ Answer: C) 1111

1111 = 8 + 4 + 2 + 1 = 15 in decimal.

Q55. Which of the following is a valid hexadecimal digit?

A) G
B) K
C) H
D) 9

✓ Answer: D) 9

Hexadecimal uses 0-9 and A-F, so 9 is a valid digit.

Q56. One gigabyte (GB) is approximately:

A) One billion bytes
B) One million bytes
C) One trillion bytes
D) One thousand bytes

✓ Answer: A) One billion bytes

A gigabyte is about 10^9 bytes.

Q57. The binary number 1001 equals which decimal number?

A) 8
B) 9
C) 7
D) 10

✓ Answer: B) 9

1001 = 8 + 1 = 9 in decimal.

Q58. Which of the following is a programming language?

A) MS Word
B) Google
C) Python
D) Windows

✓ Answer: C) Python

Python is a popular high-level programming language.

Q59. The process of finding and fixing errors in a program is called:

A) Compiling
B) Executing
C) Formatting
D) Debugging

✓ Answer: D) Debugging

Debugging means removing bugs, or errors, from code.

Q60. A program that translates an entire high-level program into machine code at once is a:

A) Compiler
B) Debugger
C) Text editor
D) Interpreter

✓ Answer: A) Compiler

A compiler converts the whole source code in one go.

Q61. Which symbol starts a single-line comment in Python?

A) //
B) #
C) /*
D) --

✓ **Answer: B) #**

In Python, text after # is ignored as a comment.

Q62. An algorithm is best described as:

A) A hardware device
B) A network cable
C) A step-by-step procedure to solve a problem
D) A computer virus

✓ **Answer: C) A step-by-step procedure to solve a problem**

Algorithms are precise step sequences for solving problems.

Q63. Which of the following is NOT a programming language?

A) C++
B) Python
C) Java
D) PowerPoint

✓ **Answer: D) PowerPoint**

PowerPoint is presentation software, not a language.

Q64. Machine language is written using:

A) Binary digits 0 and 1
B) Flowcharts
C) Symbols and icons
D) English words

✓ **Answer: A) Binary digits 0 and 1**

Machine code is the raw binary the CPU executes.

Q65. A variable in programming is:

A) A type of loop
B) A named storage location for data
C) A fixed number
D) An error message

✓ **Answer: B) A named storage location for data**

Variables hold values that a program can change.

Q66. Which statement repeats a block of code while a condition stays true?

A) for
B) switch
C) while
D) if

✓ **Answer: C) while**

A while loop keeps repeating as long as its condition is true.

Q67. What is the output of print(2 + 3 * 2) in Python?

A) 10
B) 14
C) 12
D) 8

✓ **Answer: D) 8**

Multiplication comes first: 3x2=6, then 2+6=8.

Q68. In Windows, Ctrl+A is used to:

A) Select all items
B) Open a file
C) Close a window
D) Save a file

✓ **Answer: A) Select all items**

Ctrl+A selects everything in the current window or document.

Q69. Which shortcut cuts the selected text?

A) Ctrl+V
B) Ctrl+X
C) Ctrl+Z
D) Ctrl+C

✓ **Answer: B) Ctrl+X**

Ctrl+X cuts the selection so it can be pasted elsewhere.

Q70. Alt+Tab in Windows is used to:

A) Shut down the computer
B) Refresh the page
C) Switch between open windows
D) Open the Start menu

✓ **Answer: C) Switch between open windows**

Alt+Tab cycles through the currently open windows.

Q71. Which shortcut opens a new tab in most web browsers?

A) Ctrl+W
B) Ctrl+N
C) Ctrl+R
D) Ctrl+T

✓ Answer: D) Ctrl+T

Ctrl+T opens a new blank browser tab.

Q72. Pressing the F1 key in most programs opens:

A) Help
B) The Save dialog
C) The Print dialog
D) Settings

✓ Answer: A) Help

F1 is the standard shortcut for opening help.

Q73. Ctrl+P is the standard shortcut for:

A) Paste
B) Print
C) Page setup
D) Preview

✓ Answer: B) Print

Ctrl+P opens the print dialog.

Q74. Which key refreshes the current web page?

A) F12
B) F1
C) F5
D) F2

✓ Answer: C) F5

F5 reloads the current page in browsers.

Q75. Which shortcut permanently deletes a file in Windows, skipping the Recycle Bin?

A) Delete
B) Ctrl+Delete
C) Alt+Delete
D) Shift+Delete

✓ Answer: D) Shift+Delete

Shift+Delete removes the file without sending it to the Bin.

Q76. CPU stands for:

A) Central Processing Unit
B) Central Program Utility
C) Computer Personal Unit
D) Control Processing Unit

✓ **Answer: A) Central Processing Unit**

The CPU is the main chip that executes instructions.

Q77. RAM stands for:

A) Remote Access Memory
B) Random Access Memory
C) Rapid Access Module
D) Read And Modify

✓ **Answer: B) Random Access Memory**

RAM is the temporary working memory of a computer.

Q78. PDF stands for:

A) Personal Data File
B) Public Document Folder
C) Portable Document Format
D) Printed Data Format

✓ **Answer: C) Portable Document Format**

PDF keeps a document's layout the same on any device.

Q79. USB stands for:

A) Universal Software Backup
B) United System Board
C) Unique Serial Byte
D) Universal Serial Bus

✓ **Answer: D) Universal Serial Bus**

USB is the standard for connecting devices to a computer.

Q80. LAN stands for:

A) Local Area Network
B) Linked Application Network
C) Long Access Node
D) Large Area Network

✓ **Answer: A) Local Area Network**

A LAN connects computers in a small area like an office.

Q81. BIOS stands for:

A) Basic Internet Operating Service
B) Basic Input Output System
C) Built-in Output System
D) Binary Integrated Operating Software

✓ **Answer: B) Basic Input Output System**

The BIOS starts the computer and checks hardware at boot.

Q82. HTML stands for:

A) HighText Machine Language
B) Hyperlink and Text Markup Language
C) HyperText Markup Language
D) Home Tool Markup Language

✓ **Answer: C) HyperText Markup Language**

HTML is the language used to build web pages.

Q83. DVD stands for:

A) Data Volume Disc
B) Direct Video Drive
C) Digital Video Device
D) Digital Versatile Disc

✓ **Answer: D) Digital Versatile Disc**

A DVD is an optical disc used to store video and data.

Q84. GUI stands for:

A) Graphical User Interface
B) Global User Instruction
C) General User Interface
D) Guided Utility Input

✓ **Answer: A) Graphical User Interface**

A GUI lets users interact through icons and windows.

Q85. SMTP stands for:

A) Standard Message Type Protocol
B) Simple Mail Transfer Protocol
C) Secure Message Transport Process
D) System Mail Transfer Program

✓ **Answer: B) Simple Mail Transfer Protocol**

SMTP handles sending email across networks.

Q86. OCR stands for:

A) Online Computer Repair
B) Output Control Register
C) Optical Character Recognition
D) Object Code Reader

✓ **Answer: C) Optical Character Recognition**

OCR converts scanned text images into editable text.

Q87. In computing, VIRUS is often explained as:

A) Verified Internal Resource Update System
B) Very Important Running Utility System
C) Virtual Internet Relayed User Service
D) Vital Information Resources Under Siege

✓ **Answer: D) Vital Information Resources Under Siege**

VIRUS is a well-known backronym for malicious software.

Q88. Who is known as the father of the computer?

A) Charles Babbage
B) Bill Gates
C) Steve Jobs
D) Alan Turing

✓ **Answer: A) Charles Babbage**

Charles Babbage designed the Analytical Engine.

Q89. The first electronic general-purpose computer was:

A) IBM PC
B) ENIAC
C) UNIVAC
D) Apple I

✓ **Answer: B) ENIAC**

ENIAC, completed in 1945, was the first general-purpose electronic computer.

Q90. MS-DOS, the first widely used PC operating system, was developed by:

A) Intel
B) IBM
C) Microsoft
D) Apple

✓ **Answer: C) Microsoft**

Microsoft's MS-DOS powered the first IBM personal computers.

Q91. The Analytical Engine was designed by:

A) Ada Lovelace
B) Konrad Zuse
C) John von Neumann
D) Charles Babbage

✓ Answer: D) Charles Babbage

Babbage's Analytical Engine was the first design for a general computer.

Q92. Who is credited with writing the first computer program?

A) Ada Lovelace
B) Alan Turing
C) Grace Hopper
D) Charles Babbage

✓ Answer: A) Ada Lovelace

Ada Lovelace wrote an algorithm for the Analytical Engine.

Q93. First-generation computers used:

A) Microprocessors
B) Vacuum tubes
C) Transistors
D) Integrated circuits

✓ Answer: B) Vacuum tubes

The first computers ran on bulky vacuum tubes.

Q94. Which generation of computers used transistors?

A) Third generation
B) First generation
C) Second generation
D) Fourth generation

✓ Answer: C) Second generation

Transistors replaced vacuum tubes in the second generation.

Q95. The World Wide Web was invented by:

A) Steve Jobs
B) Bill Gates
C) Larry Page
D) Tim Berners-Lee

✓ Answer: D) Tim Berners-Lee

Tim Berners-Lee created the World Wide Web in 1990.

Q96. Which of the following is a storage device?

A) USB flash drive
B) Monitor
C) Keyboard
D) Speaker

✓ **Answer: A) USB flash drive**

A USB flash drive stores data you can carry around.

Q97. Antivirus software is used to:

A) Speed up the internet
B) Detect and remove malware
C) Increase storage space
D) Edit photos

✓ **Answer: B) Detect and remove malware**

Antivirus programs find and remove viruses and malware.

Q98. A firewall in computing:

A) Charges the battery
B) Cleans the screen
C) Controls incoming and outgoing network traffic
D) Cools the processor

✓ **Answer: C) Controls incoming and outgoing network traffic**

A firewall blocks unauthorised access to a network.

Q99. Which of the following is an example of application software?

A) Device driver
B) BIOS
C) Linux
D) MS Excel

✓ **Answer: D) MS Excel**

Excel is an application used to perform a specific task.

Q100. The web page that opens by default when a browser starts is called the:

A) Home page
B) Start page
C) Index page
D) Menu page

✓ **Answer: A) Home page**

The home page is the browser's default opening page.

Answer Key

All 100 answers at a glance — use it for a final self-check.

1. B	2. C	3. D	4. A	5. B
6. C	7. D	8. A	9. B	10. C
11. D	12. A	13. B	14. C	15. D
16. A	17. B	18. C	19. D	20. A
21. B	22. C	23. D	24. A	25. B
26. C	27. D	28. A	29. B	30. C
31. D	32. A	33. B	34. C	35. D
36. A	37. B	38. C	39. D	40. A
41. B	42. C	43. D	44. A	45. B
46. C	47. D	48. A	49. B	50. C
51. D	52. A	53. B	54. C	55. D
56. A	57. B	58. C	59. D	60. A
