BOARD OF INTERMEDIATE EDUCATION, KARACHI

INTERMEDIATE (11TH CLASS) EXAMINATION, 2022

COMPUTER SCIENCE

Past Paper 2022

Retyped faithfully from the original board paper — same questions, no changes.

Section A (Multiple Choice Questions)

Maximum Marks: 29

Note: This section consists of 29 part questions and all are to be answered. Each question carries ONE mark. (Options in the original are separated by star marks, shown here as A–D in printed order. Underlines on some options in the scan are not transcribed.)

Note: Time: 3 Hours — Max. Marks: 75 — Computer Studies (Regular & Private)

Q1. Choose the correct answer for each from the given options:

Q1. One Gigabyte (GB) is equivalent to:

(A) 1024 KB
(B) 1024 MB
(C) 1024 TB
(D) 1024 ZB

Q2. EBCDIC is the abbreviation of:

(A) Extended Bit Code Decimal Interchange Code
(B) Extended Binary Coded Decimal Interchange Code
(C) Extended Bit Case Decimal Interchange Code
(D) Extended Binary Code Decimal Interchange Code

Q3. A bar-code reader is an example of a/an:

(A) Processing device
(B) Storage device
(C) Input device
(D) Output device

Q4. This is the common language of internet to develop a web page:

(A) HTML
(B) BASIC
(C) www
(D) HTTP

Q5. This is the fastest data communication medium:

(A) Co-axial cable
(B) Twisted pair cable
(C) Fiber optic cable
(D) Microwave

Q6. In Full duplex transmission, data travels in:

(A) parallel direction
(B) two directions but simultaneously
(C) two directions but not simultaneously
(D) one direction

Q7. The internal process of starting up a computer is:

(A) booting
(B) self-start
(C) warm-up
(D) start-up

Q8. This register holds the instructions awaiting execution:

(A) MCR
(B) MBR
(C) AC Register
(D) Program Counter

Q9. A Computer Virus is a:

(A) bacteria
(B) malware
(C) firmware
(D) hardware

Q10. It controls all parts of the computer system:

(A) ALU
(B) CU
(C) MU
(D) RAM

Q11. The process of converting analogue signals into digital signals is called:

(A) Modulation
(B) Demodulation
(C) Telecommunication
(D) Communication

Q12. DOS, Linus and Unix are the examples of:

(A) operating system
(B) viruses
(C) language translator
(D) a program

Q13. Hardware and software combination used for connecting similar network is a:

(A) router
(B) gateway
(C) bridge
(D) switch

Q14. A software that enables to display web pages is:

(A) HTML
(B) Web Browser
(C) www
(D) Compiler

Q15. This program translates whole program at a time:

(A) Interpreter
(B) Simulator
(C) Compiler
(D) Assembler

Q16. This network topology always uses central server:

(A) Ring
(B) Star
(C) Bus
(D) Hybrid

Q17. This technology is used in compact disks:

(A) Mechanical
(B) Electrical
(C) Electro Magnetic
(D) Laser

Q18. RAM is also called:

(A) Secondary memory
(B) Main memory
(C) External memory
(D) Non-volatile memory

Q19. The electrical path used to transfer data in CPU is called:

(A) Wire
(B) Bus
(C) Cable
(D) Port

Q20. The set of rules to send and receive data is called:

(A) Register
(B) Protocol
(C) Bus
(D) Ethernet

Q21. This is a sequantial storage medium:

(A) Magnetic Disk
(B) Magnetic Tape
(C) DVD
(D) Floppy Disk

Q22. This termis used to describe the data handling capacity of a given media:

(A) MHz
(B) bandwidth
(C) byte
(D) frequency

Q23. The peripheral devices are attached with computer through:

(A) sockets
(B) connector
(C) ports
(D) plugs

Q24. The network of networks is called:

(A) Intranet
(B) Internet
(C) Extranet
(D) LAN

Q25. A group of 4 bits is called:

(A) Word
(B) Byte
(C) Character
(D) Nibble

Q26. This is the physical path over which a message travels:

(A) Compiler
(B) Protocol
(C) Medium
(D) Operating system

Q27. OSI stands for:

(A) Operating System Interconnection
(B) Open System Interconnection
(C) Organization for Standard Internet
(D) Open System Internet

Q28. Illegal copies of copyrighted software is:

(A) fake
(B) privacy
(C) piracy
(D) photocopy

Q29. This virus replicates itself:

(A) worm
(B) bug
(C) vaccine
(D) bomb

Section 'B' (Short Answer Questions)

Maximum Marks: 30

> Note: Attempt any Ten part questions from this Section. All questions carry equal marks. No answer should exceed 6 - 7 lines.

Q2.

(i) What is an Interpreter? How does it differ from a computer?

(ii) What is Data Processing Cycle? Write its steps with the help of diagram.

(iii) What is the difference between Hardcopy and Softcopy?

(iv) Why ROM is called non-volatile memory?

(v) Write any four abuses of Internet.

(vi) State Copyright Law. Give its advantages.

(vii) Define the main components of CPU.

(viii) Draw OSI model.

(ix) Differentiate between asynchronous transmission and synchronous transmission.

(x) How computers can be useful in medical silence?

(xi) Draw a label diagram of a digital computer.

(xii) Define the instruction cycle with label diagram.

(xiii) Write full form of any three of the following: a) MBR b) ISO c) HTTP d) LED e) OMR

(xiv) Define the computer virus. Name any two viruses.

(xv) Define Star Toplogy and give its advantages.

Section 'C' (Detailed Answer Questions)

Maximum Marks: 16

> Note: Answer any TWO questions from this section. All questions carry equal marks.

Q3.

What is an Operating System? Explain the functions performed by an operating system.

Q4.

Explain different types of communication media/channel used in data communiation.

Q5.

What is a Register? Explain the functions of various types of registers.
