BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, BANNU

SECONDARY SCHOOL (10TH CLASS) EXAMINATION, 2022

BIOLOGY

Past Paper 2022

Retyped faithfully from the original board paper — same questions, no changes.

BIOLOGY (10th) — (Fresh/Re-appear) — (Version-C) — SECTION –A

Time Allowed: 20 Min | **Maximum Marks:** 12 | **Paper Code:** BN-XXXII-I

Note: Note: There are THREE sections in this paper i.e A, B & C. Attempt section A and return it to the superintendent within the given time. Q.No.1: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct fill that circle in front of the question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

Q1. the longest part of brain is:

(A) Cerebrum
(B) Thalamus
(C) Cerebellum
(D) None of these

Q2. Which of these one is a part of appendicular skeleton.

(A) Ribs
(B) Sternum
(C) Pectoral girdle
(D) Vertebral coloumn

Q3. At the birth time the number of bones in human infants are:

(A) 450
(B) 350
(C) 250
(D) 150

Q4. The Larynx open into the:

(A) Bronchus
(B) Trachea
(C) Pharynx
(D) Lungs

Q5. The Tube between the Kidney and urinary bladder is the:

(A) Ureter
(B) Urethra
(C) Renal Tubule
(D) Nephron

Q6. Which of these acts as well as exocrine gland?

(A) Pituitary gland
(B) Thyroid gland
(C) Pancreas
(D) Adrenal gland

Q7. The DNA molecule in which the gene of interest is inserted for carrying to the target cell is:

(A) Transforming DNA
(B) Carrier DNA
(C) Vector DNA
(D) Phage DNA

Q8. All of the following are classes of antibiotics except.

(A) Sulfonamides
(B) Tetracycline
(C) Penicillin
(D) Morphine

Q9. In a flower the embryo sac is farmed inside the.

(A) Anther
(B) Filament
(C) Ovule
(D) Style

Q10. What are the possible genotypes of the parents of homozygous recessive individuals?

(A) Homozygous dominant
(B) Homozygous recessive
(C) Heterozygous
(D) Both B & C

Q11. Energy flow through an Ecosystem is always.

(A) Unidirectional
(B) Cyclic
(C) Reversible
(D) Multidirectional

Q12. The relationship between Rhizobium bacteria and leguminous plant is an example of:

(A) Parasitism
(B) Mutualism
(C) Commensalism
(D) None of these

BIOLOGY (10th) — (Fresh/Re-appear) — SECTION –B

Time Allowed: 2:40 Hrs | **Maximum Marks:** 32

> Note: Note: Attempt section B & C accordingly.

Q2. (Marks 32) Q.No 2. Attempt any EIGHT parts of the following. All parts carry equal marks.

i. Why do plants not need a specialized respiratory system?

ii. Define Homeostasis and osmoregulation.

iii. How do reflex action work in human being?

iv. What is the role of insulin and glucagon?

v. State the functions of flexors and extensors.

vi. What is population planning?

vii. Describe the causes of deforestation?

viii. Write down any four advantages of fermenter.

ix. What is the role of gene in protein synthesis?

x. What is aids? Write mode of transmission.

xi. Differentiate between antibiotics and vaccines.

SECTION –C

Maximum Marks: 21

Note: Note: Attempt any THREE of the following. All questions carry equal marks

Q3.

a) Define receptor? Explain structure of sonoreceptor?

b) What are joints?

Q4.

a) Define fertilization, differentiate between external fertilization and internal fertilization.

b) Write note on lung cancer.

Q5.

Write a comprehensive note on the procedure of recombinant DNA technology?

b) Describe the structure of Embryo of a seed.

Q6.

a) Explain Mendel's law of independent assortment with the help of example.

b) Define narcotics and give examples.
