BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, BANNU

INTERMEDIATE (11TH CLASS) EXAMINATION, 2022

BIOLOGY

Past Paper 2022

Retyped faithfully from the original board paper — same questions, no changes.

GROUP – I

BIOLOGY PART-I — (Re-appear) — (VERSION A) — SECTION-A

Time Allowed: 20 minutes | **Maximum Marks:** 18 | **Paper Code:** BN-XI-XXII-II

Note: Note: There are THREE sections in this papers i.e. A, B & C. Attempt section A and return it to the superintendent within the given time. Q.No.1: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct fill that circle in front of the question number in provided bubble sheet. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero marks in that question. [Group I & II subjective scans on ilmkidunya are misfiled — both serve Chemistry papers — so only Section A is transcribed; see log.]

Q1. Poisons like cyanide, heavy metal ions & some insecticides are all _____ inhibitors.

(A) Competitive
(B) Non-competitive
(C) Feedback
(D) Both a & b

Q2. In bacteria, fastest growth occurs in _____ phase.

(A) Log
(B) Lag
(C) Stationary
(D) Decline

Q3. All of the following are autoimmune diseases except:

(A) Lupus
(B) Alpers syndrome
(C) Scleroderma
(D) Rheumatoid arthritis

Q4. Lungs are provided with extra air sacs in _____

(A) Horse
(B) Reptiles
(C) Amphibians
(D) Birds

Q5. Grape and mangoes have _____ type of inflorescence.

(A) Panicle
(B) Capitulum
(C) Corymb
(D) Umbel

Q6. Lymph is poured back to the circulatory system in _____ vein.

(A) Pulmonary
(B) Hepatic portal
(C) Subclavian
(D) Renal

Q7. The final electron acceptor in non-cyclic electron pathway is _____

(A) ATP
(B) NADP
(C) PS-I
(D) PS-II

Q8. The membrane enclosed spaces of endoplasmic reticulum are called _____

(A) Lamellae
(B) Cisternae
(C) Stroma
(D) Cristae

Q9. An enzyme that acts only in an acidic medium is:

(A) Pepsin
(B) Trypsin
(C) Rennin
(D) Amylase

Q10. Bacterial galls disease is caused by _____

(A) Erwinia carotovora
(B) Xanthomonas campestris
(C) Ralstonia solanacearum
(D) Agrobacterium tumifaciens

Q11. Which of the following mineral is needed in small quantity for the growth of plant?

(A) Potassium
(B) Iron
(C) Calcium
(D) Magnesium

Q12. One of the following antibiotics, which is the most effective against most viral infections?

(A) Penicillin
(B) Erythromycin
(C) Zanax
(D) None of these

Q13. All of the following are disease causing fungi in animals except:

(A) Aspergillus
(B) Saprolegnia
(C) Ralstonia
(D) Trichophyton

Q14. The _____ synthesize and secrete pepsinogen, the precursor to the pepsin.

(A) Chief cells
(B) Parietal cells
(C) Intrinsic factor
(D) Mucus cells

Q15. _____ provides the major force for the movement of water and solutes from roots to leaves.

(A) Translocation
(B) Bulk flow
(C) Transpiration
(D) Root pressure

Q16. When an ATP molecule is hydrolyzed into ADP and P, almost _____ Kcal energy is produced/released.

(A) 7
(B) 6
(C) 5
(D) 4

Q17. In _____ cycle, the phage does not kill or destroy the bacterium.

(A) Lytic
(B) Definitive
(C) Lysogenic
(D) Both a & b

Q18. Larva in members of phylum Mollusca, if found, is called _____

(A) Cercaria
(B) Glochidium
(C) Bipinnaria
(D) Auricularia

GROUP – II

BIOLOGY (PART-I) — (Fresh) — (Version-C) — SECTION –A

Time Allowed: 20 Min | **Maximum Marks:** 18 | **Paper Code:** BN-XIXXII-II

Note: Note: There are THREE sections in this paper i.e. A, B & C. Attempt section A and return it to the superintendent within the given time. Q.No.1: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct fill that circle in front of the question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

Q1. Lipid bilayer makes the cell membrane _____

(A) Selectively permeable
(B) Differentially permeable
(C) Permeable
(D) Non-permeable

Q2. The average pressure of blood in the veins is only _____

(A) 5-10mmHg
(B) 100mmHg
(C) 50-80mmHg
(D) 72mmHg

Q3. The fishes included in class Osteichthyes have a skeleton made of _____

(A) Pectin
(B) Chitin
(C) Cartilage
(D) Bone

Q4. Catkin type of inflorescence is found in _____

(A) Mulberry
(B) Grapes
(C) Candy Tuft
(D) Euphorbia

Q5. _____ enzymes catalyze intermolecular rearrangement.

(A) Hydrolases
(B) Transferases
(C) Lyases
(D) Isomerases

Q6. Animals found in more than one morphological form are said to exhibit _____

(A) Multigenecity
(B) Polymorphism
(C) Pseudomorphism
(D) Isolation

Q7. In Kreb's cycle succinates is oxidize into which of the following organ: acid _____

(A) Malate
(B) Oxaloacetate
(C) Fumarate
(D) Isocitrate

Q8. Which of the following types of hepatitis is also known as Serum Hepatitis

(A) Hepatitis A
(B) Hepatitis B
(C) Hepatitis C
(D) Hepatitis D

Q9. The optimum pH value for pepsin to work is _____

(A) 6.8
(B) 5.5
(C) 4.5
(D) 1.5

Q10. The end products of non-cyclic electron pathway is _____

(A) ATP
(B) NADPH2
(C) ATP & NADPH2
(D) FADH2

Q11. The technique used to divide cells into its fractions is _____

(A) Staining
(B) Centrifugation
(C) Chromatography
(D) Electrophoresis

Q12. Equisetum belongs to sub-phylum _____

(A) Psilopsida
(B) Lycopsida
(C) Sphenopsida
(D) Pteropsida

Q13. Excretion through Malpighian tubules take place in _____

(A) Mollusca
(B) Coelenterate
(C) Porifera
(D) Arthropoda

Q14. Member of phylum porifera are also known as _____

(A) Osfia
(B) Osculum
(C) Sponges
(D) Mesoglea

Q15. All the following are co-Enzyme except _____

(A) ADP
(B) FAD
(C) NAD
(D) NADP

Q16. How many polypeptides chain are present in Hemoglobin _____

(A) 4
(B) 3
(C) 2
(D) 1

Q17. The flower in which both the male and female reproductive parts are present is termed as:

(A) Staminate
(B) Pistilate
(C) Hermaphrodite
(D) Heterogamous

Q18. The kinds of Amino acids which are involved in the synthesis of protein are _____

(A) 20
(B) 30
(C) 40
(D) 50
