BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, BANNU

SECONDARY SCHOOL (9TH CLASS) EXAMINATION, 2022

BIOLOGY

Past Paper 2022 • Paper Code: BN-IX-XXII-I

Retyped faithfully from the original board paper — same questions, no changes.

SECTION – A (Version-A)

Time Allowed: 20 Min | **Maximum Marks:** 12 | **Paper Code:** BN-IX-XXII-I

Note: There are THREE sections in this paper i.e. A, B & C. Attempt section A and return it to the superintendent within the given time. You have four choices for each objective type question as A, B, C and D. The choice which you think is correct fill that circle in front of the question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

Q1. The branch of Biology which deals with the study of form, shape and structures of organisms is called:

(A) Morphology
(B) Anatomy
(C) Histology
(D) Physiology

Q2. Which one of following is not a macromolecule?

(A) Starch
(B) Protein
(C) Glucose
(D) Lipids

Q3. Observations are made with.....senses.

(A) Two
(B) Three
(C) Four
(D) Five

Q4. According to five Kingdom system of classification, Euglena belongs to kingdom.

(A) Monera
(B) Protista
(C) Fungi
(D) Animalia

Q5. The zoological name of porcupine is:

(A) Felis Leo
(B) Hystix Lecura
(C) Felis Tigris
(D) Felis Domestica

Q6. Which one of following is not bound by membrane?

(A) Ribosome
(B) Plastid
(C) Mitochondria
(D) Bacteria

Q7. Smoot muscles are example of:

(A) Nervous Tissues
(B) Epithelial tissues
(C) Muscular Tissues
(D) Connective Tissues

Q8. Meiosis was discovered in:

(A) 1850
(B) 1860
(C) 1865
(D) 1876

Q9. The enzymes which work outside the cells are called:

(A) Intercellular Enzymes
(B) Cofactors
(C) Activators
(D) Extra cellular enzymes

Q10. On of the following may not be required for respiration.

(A) Oxygen
(B) Food molecule
(C) Enzymes
(D) CO_2

Q11. In Plants which of the following micronutrients is involved in osmosis of water.

(A) Iron
(B) Copper
(C) Nickle
(D) Chlorine

Q12. Human heart is covered by a tough double membrane called.

(A) Septum
(B) Pericardium
(C) Atrium
(D) Tricuspid valve

SECTION – B

Time Allowed: 2:40 Hrs | **Maximum Marks:** 32 | **Paper Code:** BN-IX-XXII-I

> Note: Attempt section B & C accordingly.

Q2. (Marks 32) Q.No 2. Attempt any EIGHT parts of the following. All parts carry equal marks.

i. Briefly describe career of Biology in the filed of forestry and farming.

ii. Differentiate between Hypothesis and theory.

iii. What is the status of virus in classification?

iv. Differentiate between plasmolysis and Deplasmolysis.

v. Briefly describe the significance of mitosis.

vi. Differentiate between intracellular and extracellular enzymes with the help of examples.

vii. What is Anaerobic respiration? Briefly describe alcoholic fermentation.

viii. Write a note on Goiter.

ix. Briefly describe the role of calcium in human body.

x. What is transpiration? Describe the affects of humidity on transpiration.

xi. If we don't take water the whole day in the month of June, what would be the effect on volume of plasma in blood?

SECTION – C

Maximum Marks: 21 | **Paper Code:** BN-IX-XXII-I

> Note: Attempt any THREE of the following. All questions carry equal marks

Q3.

a) Describe career of biology in the filed of medicine and surgery.

b) Describe A.F.A King observations about Malaria.

Q4.

a) Describe the Living and non-living characters of viruses.

b) Draw a labeled diagram of the structure of Nucleus.

Q5. Q.No:5. Describe various phases of interphase of cell cycle with diagram.

b) Write the various properties of enzymes.

Q6.

a) Describe the different limiting factors for photosynthesis.

b) Describe myocardial infarction (Heart Attack).
