BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, SARGODHA

INTERMEDIATE (12TH CLASS) EXAMINATION, 2024

COMPUTER SCIENCE

Past Paper 2024 • Paper Code: 4833

Retyped faithfully from the original board paper — same questions, no changes.

Q. (MS-ACCESS)

Q1. Q. 1

Q1. The number of fields in a relation is called the _____ of the relation.

(A) (B)

(C) (D)

Q2. Which of the following may be a temporary file?

(A) (B)

(C) (D)

Q3. The number of characters in variable-length field are

(A) (B)

(C) (D)

Q4. Customers, cars and parts are examples of

(A) (B)

(C) (D)

Q5. A relation that is in 2NF and contains no transitive dependency is said to be in

(A) (B)

(C) (D)

Q6. The smallest meaningful unit of data in a database is called

(A) (B)

(C) (D)

Q7. (C.Lng) On successfully closing a file? The fclose( ) returns :

(A) (B)

(C) (D)

Q8. (C.Lng) stdio stands for

(A) (B)

(C) (D)

> Note: A 'BLANK' cancellation stamp fully covers Q8 option (A); marked [illegible in source scan].

Q9. (C.Lng) Which of the following is a valid character constant?

(A) (B)

(C) (D)

Q10. (C.Lng) a+=b is equivalent to

(A) (B)

(C) (D)

Q11. (C.Lng) What will be the value of s after executing the following statement s=(2000>3000)?2000:3000;

(A) (B)

(C) (D)

Q12. (C.Lng) Which of the following is not a selection statement?

(A) (B)

(C) (D)

Q13. (C.Lng) A loop within a loop is called

(A) (B)

(C) (D)

Q14. (C.Lng) Another name for built-in function is

(A) (B)

(C) (D)

Q15. (C.Lng) If int b=123, then the statement printf("%5d",b) will display.

(A) (B)

(C) (D)

> Note: Q15 (C.Lng) options are space-box graphics showing field width; transcribed as best read.

Q16. OR (VB) You can enter data in a control only when it has

(A) (B)

(C) (D)

Q17. OR (VB) _____ window contains statements that are executed when some event occurs?

(A) (B)

(C) (D)

Q18. OR (VB) The property that changes text color is

(A) (B)

(C) (D)

Q19. OR (VB) Variables name can not begin with

(A) (B)

(C) (D)

Q20. OR (VB) One execution of a loop is known as

(A) (B)

(C) (D)

Q21. OR (VB) _____ is an example of post test loop.

(A) (B)

(C) (D)

Q22. OR (VB) Image control holds a graphic that is assigned to _____ property.

(A) (B)

(C) (D)

Q23. OR (VB) A control that provides an identifiable grouping for control is

(A) (B)

(C) (D)

Q24. OR (VB) The Integer data type in VB occupies _____ bytes

(A) (B)

(C) (D)

Q. SECTION ---------- I

Q2. (Marks 6 × 2 = 12) 2. Answer briefly any Six parts from the following. (MS-Access)

(i) Define data file with example?

(ii) What are two responsibilities of DBA?

(iii) Identify Primary key and foreign key from following tables structures? Table 1: Roll No | Name | City Table 2: Roll No | Subject | Marks

(iv) What is meant by user processing requirements?

(v) Write the purpose of feasibility study?

(vi) Why is normalization used?

(vii) Which database objects can be used to create a report?

(viii) Define referential integrity?

(ix) Differentiate between Form and Report?

Q3. (Marks 6 × 2 = 12) 3. Answer briefly any SIX parts from the followings:-

Q. C – Language

(i) What is variable initialization? (ii) Write down the equivalent C statement for: $(a-b)^2$ (iii) Find errors in the following code segment: int x = 10 + 20; scanf("%d", x); printf("value of x = ", x); (iv) What is the output of the following code segment: int x = 2 , y = 3 , z; z = (x+5) / (y+5); printf("%d",x+y+z); (v) Differentiate between getch( ) and getche( ) functions. (vi) Find the errors in the following code segments: int L = 10 , W = 5 , A; L * W = A; printf("Area = %d", Area); (vii) What is the output of the following code segment: char ch1 = 'A' , ch2 = 'B'; ch1 = ch2; ch2 = ch1; printf("%c %c", ch1 , ch2); (viii) Differentiate between text stream and binary stream. (ix) What is an EOF?

Q. Visual Basic

(i) What is variable initialization? (ii) Write down the equivalent VB statement for: $(a-b)^2$ (iii) What is form layout window? What is its purpose? (iv) What is the format of constant to define color in VB. (v) Define scale Mode property. (vi) Define Window State property. (vii) What is the purpose of Fixed Dialog style? (viii) What is the purpose of Tag property of Text box control. (ix) How can you verify that a Listbox item is selected or not?

Q4. (Marks 6 × 2 = 12) 4. Answer briefly any Six parts from the followings:-

Q. C – Language

(i) Define control structure. (ii) Determine the output: int a = 1 , b = 5 ; if ((a+b) < 6) printf("Result=%d",b); printf("Answer=%d",a+b); (iii) What is sentinel value? (iv) Write the output of the following code: K = 0; while(K<=5) { printf("%3d%3d\n",K,10-K); K++; } (v) Convert the following code by using for loop: int count = 1; while (count <= 10) { printf("%d\n",count); count++; } (vi) Describe unstructure programming. (vii) What is function header? (viii) Define actual parameters. (ix) Write any two benefits of user defined functions

Q. Visual Basic

(iv) Write the syntax of input BOX. (v) What is the purpose of Val function? (vi) Write the syntax of IF-THEN structure (vii) Define compound comparison. (viii) Describe the purpose of continue statemer (ix) Write the syntax of Wile-Wend loop

Q. SECTION ---------- II

Note: Attempt any ONE question. MS - ACCESS (8 × 1 = 8)

Q5. 5. Define DBMS. Explain different features of a dbms?

Q6. 6. Explain different data types available in MS-Access.

Q. SECTION ---------- III

Note: Attempt any TWO questions either from "C – Language" OR from "Visual Basic". (8 × 2 = 16)

Q7. 7. C – Language: Briefly describe the basic structure of C program?

7. --OR--Visual Basic: Briefly describe the basic structure of Visual Basic program?

Q8. 8. C – Language: Write a program that inputs temperature and displays a message according to the following data.

Temperature | Message: Greater than 40 → Hot day; Between 25 and 40 (inclusive) → Pleasant day; Less than 25 → Cool day

8. --OR--Visual Basic: Write a program that inputs temperature and displays a message according to the following data. (same table)

Q9. 9. C – Language: Write a program in C-Language that display numbers from 1 to 20 and also compute and display their sum and average by using loop.

9. --OR--Visual Basic: Write a program in VB that display numbers from 1 to 20 and also compute and display their sum and average by using loop.
