MCQs Tayyari presents

BISE Lahore

10th Class • Computer Science

Past Paper 2024

Group I & II • Objective + Subjective

Retyped faithfully from the original board paper — same questions, no changes.

mcqstayyari.online

Group I

Computer Science (Objective Type) - Group - I

Time Allowed: 15 Min. | Maximum Marks: 10

Note: Four possible answers A, B, C and D to each question are given. The choice which you think is correct, fill that circle in front of that question with Marker or Pen ink in the answer book. Cutting or filling two or more circles will result in zero mark in that question.

Q1. Which of the following is a valid line of code :

(A) int = 10 ;
(B) float = 3.4 ;
(C) char grade = 'A' ;
(D) char = 'A' ;

Q2. — part of for loop is executed first:

(A) Initialization
(B) Condition
(C) Increment/decrement
(D) Body

Q3. If there are three return statements in the function body --------- of them will be executed :

(A) One
(B) Two
(C) Three
(D) First and last

Q4. In C language character constant is written within :

(A) " "
(B) ' '
(C) [illegible in source scan]
(D) #

Q5. A software that facilitates programmers in writing computer programmes is known as :

(A) Compiler
(B) Debugger
(C) Editor
(D) IDE

Q6. What is the result of 13+21% (41-20):

(A) 34
(B) 10
(C) 13
(D) 12

Q7. In this function int is a: int msg () { printf ("keep it up") ; }

(A) Argument
(B) Parameter
(C) Body
(D) Return type

Q8. An array is a — structure:

(A) Control
(B) Loop
(C) Data
(D) Conditional

Q9. Which of the following is the condition to check a is a factor of b:

(A) a % b == 0
(B) b % a == 0
(C) a / b == 0
(D) b / a == 0

Q10. What is the output of the following code : int m = 80 ; if (m > 70 && m < 80) printf ("Pass") ; else printf ("Fail") ;

(A) Pass
(B) Fail
(C) 0
(D) 1

Computer Science (Essay Type) (PART - I) - Group - I

Time Allowed: 1.45 hrs. | Maximum Marks: 40

Q2. (Marks 8) Write short answers to any FOUR (4) questions:

(i) Define identifier.

(ii) Write the general structure for the initializing a variable at the time of declaration.

(iii) Describe text editor.

(iv) What is assignment operator?

(v) Define arithmetic operators.

(vi) Evaluate the following expression : 32/4 * 3 + 9%4 + (3 *2)

Q3. (Marks 8) **Write short answers to any FOUR (4) questions:**

(i) What is the output of following code : int a = 10; if(a+10*4 = = 100) printf ("yes"); else printf ("No");

(ii) Identify the errors in the following code : if (1 < 2 < 3) printf ("1")

(iii) What is common mistake in compound statement?

(iv) Draw a flow chart of if statement in C-language.

(v) What is meant by array index?

(vi) Write syntax of array declaration.

Q4. (Marks 8) **Write short answers to any FOUR (4) questions:**

(i) Why return keyword is used in function?

(ii) What is meant by return type of a function?

(iii) Briefly explain function call.

(iv) Write down structure of function definition.

(v) Find error(s) in the following code: for (int'i = 0, i < 20; i ++) printf ("%d \ n", i) ;

(vi) Write out put of the following code: int sum = 0, P ; for(P = 1 ; P< 20; P = P + 2) sum = sum + 2; printf ("sum = %d", sum);

Computer Science (Essay Type) (PART - II) - Group - I

Time Allowed: 1.45 hrs. | Maximum Marks: 40

Note: Attempt any TWO (2) questions.

Q5. (Marks 8) **Explain int and float data type in C-language.**

Q6. (Marks 8) **Explain printf () and scanf () functions with the help of suitable example.**

Q7. (Marks 8) **Write a program that print the table of 5 using "for" loop in C-language.**

Group II

Computer Science (Objective Type) - Group - II

Time Allowed: 15 Min. | Maximum Marks: 10

Note: Four possible answers A, B, C and D to each question are given. The choice which you think is correct, fill that circle in front of that question with Marker or Pen ink in the answer book. Cutting or filling two or more circles will result in zero mark in that question.

Q1. A float uses — bytes of memory:

(A) 3 **(B)** 5

(C) 4 **(D)** 7

Q2. — is a software that is responsible for the conversion of programme files to machine understandable and executable code :

(A) Compiler **(B)** Editor

(C) Debugger **(D)** IDE

Q3. What will be the answer of following statement: float a = 10.0/4

(A) 2 **(B)** 2.5

(C) 1 **(D)** 10

Q4. The operator % is used to calculate —:

(A) Percentage **(B)** Remainder

(C) Factorial **(D)** Square

Q5. What will be the output of the following code : if (1 > 0) printf (" 1 "); else printf ("0");

(A) 0 **(B)** 1

(C) "1" **(D)** "0"

Q6. Conditional logic helps in —:

(A) Decisions **(B)** Iterations

(C) Traversing **(D)** Reversing

Q7. — part of For Loop is executed first:

(A) Initialization **(B)** Condition

(C) Body **(D)** Increment/decrement

Q8. — make it easier to read and write values in array:

(A) Loops **(B)** Conditions

(C) Expressions **(D)** Functions

Q9. The advantages of using functions are —:

(A) Executing **(B)** Reusability

(C) Printing **(D)** Compiling

Q10. Function input is called —:

(A) Parameters **(B)** Return value

(C) Function signature **(D)** Identifier

Computer Science (Essay Type) (PART - I) - Group - II

Time Allowed: 1.45 hrs. | Maximum Marks: 40

Q2. (Marks 8) Write short answers to any FOUR (5) questions:

(i) What is the purpose of using a compiler?

(ii) What is a case sensitive language?

(iii) Explain briefly types of comments in C-language.

(iv) What dc you know about operator precedence?

(v) What is the purpose of arithmetic operators?

(vi) Convert into a logical expression : $a = bc^2 + 6b$

Q3. (Marks 8) Write short answers to any FOUR (4) questions:

(i) Define conditional logic?

(ii) What do you mean by associate code in if statement?

(iii) Find errors in the following code: percentage = 55; if (percentage > 755); printf ("Pass ");

(iv) Write output of the following code: int C = 9; if (C<10); printf ("10"); else printf ("9");

(v) Write syntax to declare an array.

(vi) Write name of different loops used in C-language.

Q4. (Marks 8) Write short answers to any FOUR (4) questions:

(i) Identify errors in the following code : x [15] float marks [10];

(ii) Write the output of the following code: for (int x = 2; x< = 20; x = x + 2) printf ("%d\n", x);

(iii) Differentiate between function arguments and parameters.

(iv) Define function.

(v) Write the general structure of function signature.

(vi) What do you know about the return keyword?

Computer Science (Essay Type) (PART - II) - Group - II

Time Allowed: 1.45 hrs. | Maximum Marks: 40

Note: Attempt any TWO questions.

Q5. Define variable. Write down its rules.

Q6. Explain the logical operators with the help of truth table.

Q7. Write a program using FOR Loop to print even number from 2 to 20.
