BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, HYDERABAD

SECONDARY SCHOOL (9TH CLASS) EXAMINATION, 2023

CHEMISTRY

Past Paper 2023

Retyped faithfully from the original board paper — same questions, no changes.

Section-A (Multiple Choice questions)

Note: Q. No:1 Choose the correct answer for each from the given options:

Q1. Molar mass of H2SO4 is:

(a) 98 a.m.0
(b) 9.8 gm
(c) 98 gm
(d) 9.9 a.m.u

Q2. A piece of matter in pure form is termed as:

(a) Radical
(b) Mixture
(c) Compound
(d) Substance

Q3. Tendency of atoms to acquire eight electrons in their valence shell is:

(a) Octet rule
(b) duplet rule
(c) Triplet rule
(d) None of these

Q4. The strength of inter molecular forces from ionic or covalent bond is:

(a) Weaker
(b) stronger
(c) equal
(d) None of these

Q5. If a proton number is 19, electron configuration will be:

(a) 2,8,9
(b) 2,8,8,1
(c) 2,8,1
(d) 2,8,3

Q6. Example of heterogeneous mixture is:

(a) Sugar and water
(b) Sand and water
(c) Salt and water
(d) Ink and water

Q7. Which one is oxidizing agent:

(a) Al
(b) H2S
(c) Cl2
(d) NaH

Q8. Chlorine can be displaced by:

(a) F
(b) Br
(c) I
(d) At

Q9. Which rays are used for sterilization of medical instruments:

(a) alpha-rays
(b) beta-rays
(c) gamma-rays
(d) X-rays

Q10. The elements of VITA group are known as:

(a) Lanthanide
(b) Actinide
(c) Halogens
(d) Nobel Gases

Q11. The shielding effect across the period:

(a) Increases
(b) Decreases
(c) Moderate
(d) Same

Q12. Which of the following have sharp melting point in solid:

(a) Plastic
(b) Rubber
(c) Glass
(d) Diamond

(SECTION-B) (Short Answers)

> Note: Answer any EIGHT of the following questions. Each question carrier 03 masks.

Q1. Differentiate between the Physical and analytical chemistry.

Q2. Describe relationship between empirical and molecular formula. Explain with examples.

Q3. Balance the given equations by inspection method: (i) NH3+O2 -> NO+H2O (ii) CO+O2 -> CO2 (iii) KClO3 -> KCl + O2

Q4. What are limitations of Boor's Atomic model.

Q5. Identify that which halogens exist as gases, liquid and solid.

Q6. Write characteristics of ionic compounds.

Q7. Define the allotropy with examples.

Q8. Define the following: (i) Boiling point (ii) melting point (iii) Freezing Point

Q9. Differentiate between the saturated and unsaturated solution?

Q10. Define oxidizing and reducing agent with examples.

Q11. Define oxidizing and reducing agent with examples.

Q12. How many moles are required to prepare 40gm H_2SO_4

Q13. What to you mean by chemical species, explain ion, molecular and free radical?

Q14. How many protons, neutrons and electrons are present in the fo9llowing?

Q15. Define metallic bonds are formed?

Q16. The pressure of a sample gas is 8 atom and volume is 15 litters. If the pressureisreduced to 6 atom, what is the volume?

Q7. Define the term solubility. Howe does nature of solute and solvent determine the extent of dissolution?

Q18. Explain process of electrolysis in electrolytic cell.
