BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, FAISALABAD

INTERMEDIATE (12TH CLASS) EXAMINATION, 2023

COMPUTER SCIENCE

Past Paper 2023

Retyped faithfully from the original board paper — same questions, no changes.

Computer Science — Subjective

Time Allowed: 02:10 Hours | **Maximum Marks:** 60 | **Paper Code:** 1215

Note: SECTION - I

Q2. (Marks 12) Write short answers to any SIX parts. (MS-Access)

(i) What do you know about data dictionary?

(ii) What is [illegible in source scan]?

(iii) How is entity integrity achieved?

(iv) What is database anomaly?

(v) What is meant by RDBMS?

(vi) Define entity.

(vii) State the use of wild cards.

(viii) How is criteria specified in query?

(ix) What is sub-form?

Q3. (Marks 12) Write short answers to any SIX parts. (C - Language)

(i) Distinguish between source code and object code.

(ii) What is meant by machine independence?

(iii) What is the use of "define" preprocessor?

(iv) List two causes of syntax error.

(v) What is variable? Why it is used in programs?

(vi) Declare a float variable with name avg.

(vii) Find errors in the following code segment: int m, n; m = 10.3; n = 5; printF ("%5d", m)

(viii) Predict output of the following code segment: int x = 5; printf ("%d\t%d", 2 * x, 3 + x);

(ix) What is text stream?

> Note: OR (Visual Basic)

(i) What is the difference between events and methods?

(ii) How are the properties set at design time and run time?

(iii) Write two rules for naming controls in VB.

(iv) Why Visual Basic is called even-driven language?

(v) What are three steps for creating VB projects?

(vi) Write the purpose of textbox control?

(vii) What is the purpose of command button?

(viii) List types of property values?

(ix) What is meant by show form method?

Q4. (Marks 12) Write short answers to any SIX parts. (C - Language)

(i) Define standard input.

(ii) List three types of format specifiers.

(iii) Convert the following code into do-while loop: int i = 0; while ([illegible in source scan]) { printf ("loop statement")

(iv) Predict the output: int a = 5; if (a % 2 == 0) printf ("Pakistan"); else printf ("Zindabad");

(v) What is conditional operator?

(vi) Convert the following code to an equivalent if-else statement: (x > y) ? x * y : x + y;

(vii) Draw the flowchart of do-while loop.

(viii) What is sentinel value?

(ix) Trace the output of the following code: printf ("Book\treading\n"); printf ("is a\tvery good");

> Note: OR (Visual Basic)

(i) Define standard input

(ii) What is default property of command button?

(iii) Trace output: if 10 mod [illegible in source scan] = 1 then print "[illegible in source scan]" End if

(iv) How many times the following loop execute? do while i >= 1 i = i + 1 loop

(v) Define [illegible in source scan] operators

(vi) Draw the flowchart of: if - then - else structure

(vii) Write the syntax of while-wend loop.

(viii) What is goto statement?

(ix) Define nested loop.

> Note: SECTION - II Each question carries 08 marks.

Q5. (Marks 08) (MS-Access) Attempt any ONE question from the following: Define data processing. What activities are involved in data processing? Discuss in detail.

Q6. (Marks 08) Discuss different data distribution strategies in detail.

> Note: Attempt any TWO questions either from C-Language OR Visual Basic (C - Language)

Q7. (Marks 08) What is switch statement? Explain its working with the help of example.

Q8. (Marks 08) Write a program that gets starting and ending point from the user and displays all odd numbers in the given range using loop.

Q9. (Marks 08) What is a global variable? Explain its scope and life time with example.

> Note: (Visual Basic)

Q7. (Marks 08) What is select --- case structure? Explain its working with the help of example.

Q8. (Marks 08) Write a program that gets starting and ending point from the user and displays all odd numbers in the given range using loop.

Q9. (Marks 08) What is a global variable? Explain its scope and life time with example.
