(D) Control-units

Q2. Which technology is used to read data on cheques?

(A) OMR
(B) OCR
(C) CAT
(D) MICR

Q3. Transmission from earth to satellite is called.

(A) Unlink
(B) Downlink
(C) Low link
(D) High link

Q4. How many characters ASCII 8-bit code cant represent?

(A) 128
(B) 256
(C) 364
(D) 512

Q5. Internal network of an organization that uses Internet and web techniques is called:

(A) Downloading
(B) Loading
(C) Intranet
(D) Extranet

Q6. In OSI model, which layer is responsible for encryption and decryption of data?

(A) Presentation
(B) Application
(C) Transport
(D) Session

Q7. The modular testing of a program is also called:

(A) Pilot testing
(B) System testing
(C) Incremental testing
(D) Unit testing

Q8. XGA supports colours upto:

(A) 1 million
(B) 16.7 million
(C) 1 billion
(D) 16.7 billion

Q9. Hypertext document is also called:

(A) Webpage
(B) Hyperlink
(C) Email server
(D) Website

Q10. Which is correct formula in MS-Excel?

(A) + D3&D4
(B) = D3&D4
(C) + D3,D4
(D) = D3+D4

Q11. The direction of proper in printing is referred to as:

(A) Position
(B) Orientation
(C) Style
(D) Direction

Q12. The interface used by Windows is called:

(A) Command line interface
(B) Graphical user interface
(C) Prompt interface
(D) Dialog interface

Q13. A person who gains illegal access to a computer system is called:

(A) Hacker
(B) Computer operator
(C) Network controller
(D) Administrator

Q14. The output of the compiler is called:

(A) The program
(B) Source code
(C) Object code
(D) Linker code

Q15. Which is a signal?

(A) Memory
(B) DMA
(C) Bus
(D) Interrupt

Computer Science (Subjective) Group - I

Time Allowed: 02:10 Hours | **Maximum Marks:** 60

> Note: SECTION-I

Q2. (Marks 12) Write short answers any Six (6) questions of the following:

i. What do you understand by term global village?

ii. Define packaged software.

iii. Convert 320 MB into bytes.

iv. How parallel implementation different from direct implementation in SDLC?

v. How does computer help in marketing?

vi. Write two uses of ATM.

vii. Define desktop publishing.

viii. What is meant by active cell in MS-Excel?

ix. Write a function to find average of values from cell A5 to A10.

Q3. (Marks 12) Write short answers to any six parts of the following:

i. Describe two uses of computer network.

ii. What is the internet?

iii. Write two functions of data link layer.

iv. Differentiate between encoder and decoder.

v. Define parallel transmission.

vi. Explain digital signal.

vii. What is website?

viii. Define web publishing.

ix. What is an email address? Give an example.

Q4. (Marks 12) Write short answers to any six parts from the following:

i. Write the purpose of data transfer instructions.

ii. What is meant by port?

iii. Define computer virus.

iv. How pirated software spread virus?

v. Write two objectives of computer security.

vi. What is the use of control panel?

vii. Write two advantages of GUI operating system.

viii. How font can be bold and underlined?

ix. How do cut and copy command work?

> Note: SECTION-II

> Note: Attempt any two Questions. (8x3=24)

Q5. Define display screen. Discuss different types of display screens.

Q6. What is bus topology? Explain its working with diagram. Discuss its advantages and disadvantages.

Q7. What is data communication mode? Explain different data communication modes.

Q8. What is ROM? Discuss its different types.

Q9. What are CPU registers? Explain different general-purpose registers.
