BOARD OF INTERMEDIATE AND SECONDARY EDUCATION, RAWALPINDI

INTERMEDIATE (11TH CLASS) EXAMINATION, 2023

COMPUTER-SCIENCE

Past Paper 2023

Retyped faithfully from the original board paper — same questions, no changes.

COMPUTER — Part (Part-I) — (Session: 2023) — Class - XI — (OBJECTIVE) — (Group-I) — New Scheme

Time Allowed: 20 Minutes | **Maximum Marks:** 15

Note: Note:- You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, fill that circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

Q1. The order of stack is:

(A) FIFO
(B) GIGO
(C) FIGO
(D) LIFO

Q2. A virus that replicates itself is called:

(A) Worm
(B) Bug
(C) Bomb
(D) Vaccine

Q3. The maximum number of primary partitions that can be created on a disk are:

(A) Two
(B) Three
(C) Four
(D) Five

Q4. Clipboard stores _____.

(A) Copied text
(B) Deleted text
(C) Entered text
(D) Repeated text

Q5. A built-in formula is known as:

(A) Update
(B) Procedure
(C) Calculate
(D) Function

Q6. The format of an email address is

(A) User name # DNS Address
(B) User name @ DNS Address
(C) User name $ DNS Address
(D) User name ! DNS Address

Q7. The name for screen clarity

(A) Discrete
(B) Pixel
(C) Resolution
(D) LCD

Q8. 1GB of memory in bytes is equal to:

(A) 2^{30}
(B) 2^{20}
(C) 2^{40}
(D) 2^{10}

Q9. The protocol used over the Internet is

(A) SNA
(B) TCP/IP
(C) Token-Ring
(D) Ethernet

Q10. Which layer of OS model does data compression?

(A) Application layer
(B) Physical layer
(C) Session layer
(D) Presentation layer

Q11. The physical path over which a message travels is:

(A) Protocol
(B) Signal
(C) Node
(D) Medium

Q12. Concurrent flow of bits is done in transmission.

(A) Parallel
(B) Serial
(C) Asynchronous
(D) Synchronous

Q13. Which technology is used to read data on cheques:

(A) OMR
(B) MICR
(C) OCR
(D) CAT

Q14. CPU is an example of:

(A) Software
(B) A program
(C) Hardware
(D) An output unit

Q15. Cache memory works between:

(A) RAM and ROM
(B) MMU and Hard disk
(C) CPU and RAM
(D) CPU and Hard disk

COMPUTER — Part (Part-I) — (Session: 2023) — Class - XI — (SUBJECTIVE) — (Group-I) — New Scheme

Time Allowed: 2:10 Hours | **Maximum Marks:** 60

SECTION-I

Q2. Write short answers any Six (6) questions of the following: 12

(i) Define the term digital convergence.

(ii) How did Information Technology make our world as global village?

(iii) Write two types of plotters.

(iv) Convert 32 bytes into bits.

(v) Give any two uses of computer in business.

(vi) What is meant by computer simulation?

(vii) Describe video-conferencing.

(viii) Differentiate between function and formula.

(ix) Write the function to calculate the minimum value from A_1 to A_5 cells.

Q3. Write short answers to any six parts of the following: 12

(i) What is workgroup computing?

(ii) Compare intranet and extranet.

(iii) Write any two functions of network layer,

(iv) How does FDM work?

(v) What do you know about wireless modem?

(vi) Define digital signal.

(vii) Describe domain name system

(viii) List two advantages of email.

(ix) Why newsgroups are created on the Internet?

Q4. Write short answers to any six parts from the following: 12

(i) How does cache memory work?

(ii) Why does DRAM use more power?

(iii) What is password?

(iv) Write two ways in which data security is violated?

(v) Define computer virus.

(vi) What is the purpose of recycle bin?

(vii) Define primary partition.

(viii) What is meant by editing a document?

(ix) Define paragraph formatting.

SECTION-II

Attempt any two Questions. (8x3=24)

5. What is video display adapter? Discuss its different types.

6. What is STAR TOPOLOGY? Explain its working with diagram. Also write its advantages and disadvantages.

7. What is data transmission mode? Explain its types with example.

8. Describe computer architecture. Discuss different components of Computer Architecture.

9. Describe CPU register. Discuss General-purpose registers.
